FORWARD-LOOKING INFORMATION

This Annual Information Form (“AIF”) contains forward-looking statements pertaining to purchase obligations, planned capital expenditures, anticipated completion dates of projects, the impact of changes in government regulation and non-regulated generating capacity subject to long term contracts. The Corporation’s actual results could differ materially from those anticipated in these forward-looking statements as a result of regulatory decisions, competitive factors in the industries in which the Corporation operates, prevailing economic conditions, and other factors, many of which are beyond the control of the Corporation.

DEFINITIONS OF CERTAIN TERMS

Certain terms used in this Annual Information Form are defined below:

“AEUB” means the Alberta Energy and Utilities Board;

“AGP” means ATCO Gas and Pipelines Ltd.;

“Alberta Power (2000)” means Alberta Power (2000) Ltd.;

“Alberta Power Pool” means the market for electricity in Alberta operated by the Alberta Electric System Operator;

“ASHCOR Technologies” means ASHCOR Technologies Ltd.;

“ATCO Electric” means ATCO Electric Ltd.;

“ATCO Frontec” means ATCO Frontec Corp. together with its subsidiaries;

“ATCO Gas” means the natural gas distribution division of AGP;

“ATCO I-Tek” means ATCO I-Tek Inc.

“ATCO I-Tek Business Services” means ATCO I-Tek Business Services Ltd.;

“ATCO Midstream” means ATCO Midstream Ltd.;

“ATCO Pipelines” means the natural gas transportation division of AGP;

“ATCO Power” means ATCO Power Ltd. together with its subsidiaries;

“ATCO Resources” means ATCO Resources Ltd., a wholly owned subsidiary of ATCO Ltd.;

“ATCO Travel” means ATCO Travel Ltd.;

“ATCO Utility Services” means ATCO Utility Services Ltd.;

“BPL” means Barking Power Limited;

“Class A shares” means the Class A non-voting shares of the Corporation;

“Class B shares” means the Class B common shares of the Corporation;

“Corporation” means Canadian Utilities Limited and, unless the context otherwise requires, includes its subsidiaries;

“CU” means Canadian Utilities Limited;

“CU Water” means CU Water Limited;

“EEEP” means the Edmonton Ethane Extraction Plant;

“EUA” means the Electric Utilities Act (Alberta);

“Genics” means Genics Inc.;

“GUA” means the Gas Utilities Act (Alberta);

“km” means kilometre;

“Mmcf” means one million cubic feet and “Bcf” means one billion cubic feet;

“negotiated settlement” means an agreement related to a revenue requirement and/or customer rates for a specific period of time resulting from direct negotiations between a utility and its customers. A negotiated settlement avoids the need for a general rate application for the duration of the agreement. All negotiated settlements must be approved by the AEUB;

“NLD” means Northland Utilities (NWT) Limited;

“NUY” means Northland Utilities (Yellowknife) Limited;

“petajoule” means a unit of energy equal to approximately 948.2 billion British thermal units, “terajoule” means a unit of energy equal to approximately 948.2 million British thermal units and “gigajoule” means a unit of energy equal to approximately 948.2 thousand British thermal units;

“PPA” means power purchase arrangements that became effective on January 1, 2001, as part of the process of restructuring the electric utility business in Alberta. The PPA’s are legislatively mandated and approved by the AEUB;

“REA” means Rural Electrification Association. REA’s are constituted under the Rural Utilities Act (Alberta) by groups of persons carrying on farming operations. Each REA purchases electric power for distribution to its members through a distribution system owned by that REA;

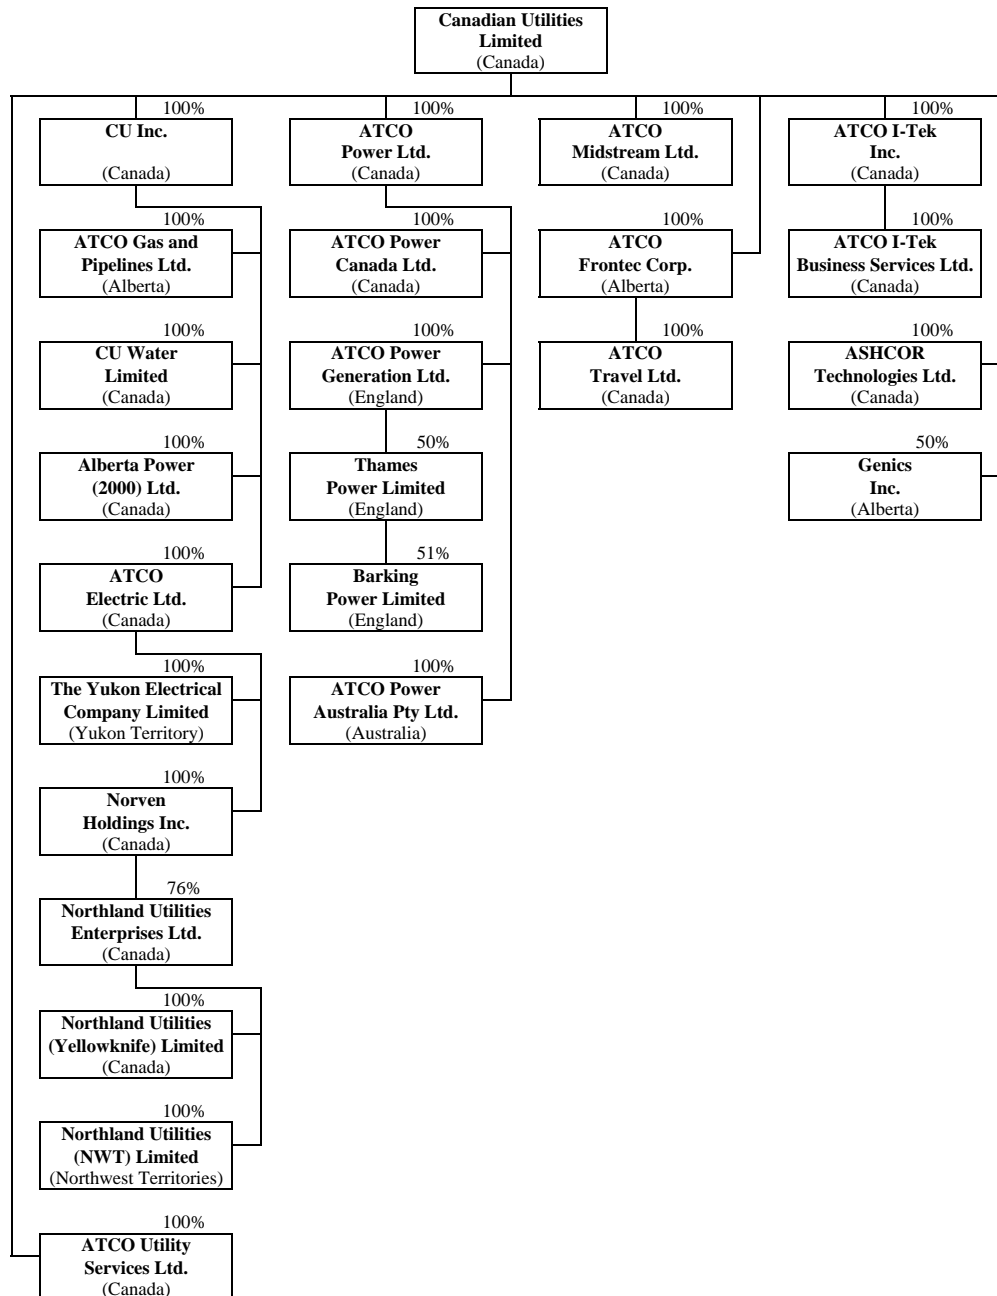

“Thames Power” means Thames Power Limited;

“YECL” means The Yukon Electrical Company Limited.

CANADIAN UTILITIES LIMITED

Canadian Utilities Limited was incorporated under the laws of Canada on May 18, 1927, and was continued under the Canada Business Corporations Act on August 15, 1979. The common share capital of the Corporation was reorganized on September 10, 1982. The address of the principal office of the Corporation is 1600, 909 – 11th Avenue S.W., Calgary, Alberta T2R 1N6 and the registered office of the Corporation is 20th Floor, 10035 – 105 Street, Edmonton, Alberta, T5J 2V6.

The following chart includes the names of the principal operating subsidiaries of the Corporation, the jurisdictions under the laws of which they are organized and the percentages of their shares beneficially owned or over which control or direction is exercised by the Corporation.

BUSINESS OF THE CORPORATION

The Corporation is a holding company. Its principal operating subsidiaries are engaged in regulated natural gas and electric energy operations, primarily in Alberta, and in related non-regulated operations. Regulated operations are conducted by ATCO Electric and its subsidiaries, NLD, NUY and YECL, ATCO Gas and ATCO Pipelines. Included in regulated operations are the generating plants of Alberta Power (2000), which were regulated by the AEUB until December 31, 2000, but are now governed by legislatively mandated PPA's that were approved by the AEUB. These plants are included in regulated operations primarily because the PPA's are designed to allow the owners of generating plants constructed before January 1, 1996, to recover their forecast fixed and variable costs and to earn a return at the rate specified in the PPA's. The plants will become deregulated upon the expiry of the PPA's. Each PPA is to remain in effect until the earlier of the last day of the estimated life of the related generating plant and December 31, 2020.

The Corporation operates in the following business segments:

The **Utilities** Business Group includes the regulated distribution of natural gas by ATCO Gas, the regulated distribution and transmission of electric energy by ATCO Electric and its subsidiaries, NLD, NUY and YECL, the regulated transportation of natural gas by ATCO Pipelines, the regulated transmission and distribution of water by CU Water, and the provision of non-regulated complementary projects by ATCO Utility Services.

The **Power Generation** Business Group includes the non-regulated supply of electricity and cogeneration steam by ATCO Power and the regulated supply of electricity by Alberta Power (2000).

The **Global Enterprises** Business Group includes the non-regulated gathering, processing, storage, purchase and sale of natural gas by ATCO Midstream, the provision of project management and technical services for customers in the industrial, defence and transportation sectors by ATCO Frontec, the development, operation and support of information systems and technologies by ATCO I-Tek, the provision of billing services, payment processing, credit, collection and call centre services by ATCO I-Tek's subsidiary, ATCO I-Tek Business Services, the sale of fly ash and other combustion byproducts produced in coal fired electrical generating plants by ASHCOR Technologies, the manufacture of wood preservation products by Genics and the sale of travel services to both business and consumer sectors by ATCO Travel.

The Corporate and Other segment includes commercial real estate owned by the Corporation in Fort McMurray, Alberta.

Three Year History

The significant events and conditions that have influenced the general development of the Corporation's business over the past three years are summarized below. A number of these events and conditions are discussed in greater detail elsewhere in this Annual Information Form.

2005:

- Volatility in prices received for electricity sold to the Alberta Power Pool and for electricity sold into the United Kingdom Power Exchange Market by ATCO Power.
- Fluctuations in temperatures affecting ATCO Gas' operations.
- In 2005, the Corporation received \$83.1 million as its share of the partial settlement of the claim for damages related to TXU Europe's breach of its contract with BPL. An additional payment of \$16.6 million was received on January 19, 2006 and a final installment of approximately \$1.6 million is expected in the second quarter of 2006. The settlement is expected to generate earnings after income taxes and non-controlling interests of approximately \$69 million, based on foreign currency exchange rates in effect on March 30, 2005, which will be recognized over the remaining term of the TXU Europe contract to

September 30, 2010, at approximately \$11 million per year. These earnings will be dependent upon the foreign currency exchange rates in effect at the time the earnings are recognized.

- In November 2005, the AEUB announced a generic return on common equity of 8.93% for 2006. In January 2006, the AEUB clarified that the generic return on equity determined in accordance with the generic cost of capital decision should apply to each year of the test period in the companies applications. If no rate applications are filed for a particular year, then there will be no adjustment to the common equity rate of return for that year.
- In November 2005, the AEUB approved ATCO Pipelines as the party to manage the acquisition and sale of working gas at its salt cavern storage. Salt cavern working gas had historically been acquired by ATCO Gas and its predecessors.
- In May 2005, ATCO Gas filed a general rate application with the AEUB for the 2005, 2006 and 2007 test years requesting, among other things, increased revenues to recover increased financing, depreciation and operating costs associated with increased rate base in Alberta. In June 2005, ATCO Gas filed an application requesting interim refundable rates pending the AEUB's decision on the general rate application. On August 28, 2005, ATCO Gas received a decision from the AEUB approving an interim refundable rate increase, to be collected from northern customers, of \$7.0 million. A decision from the AEUB was received on January 27, 2006, which resulted in an earnings impact that is not materially different from the earnings based on the interim rates approved by the AEUB in August 2005.
- In April 2005, ATCO Midstream leased the full storage capacity at ATCO Gas' Carbon natural gas storage facility for the 2005/2006 year resulting in higher storage revenues due to higher capacity leased and the timing and demand of storage capacity sold.

2004:

- Volatility in prices received for electricity sold to the Alberta Power Pool by ATCO Power.
- In August 2004, the Corporation reorganized its structure into three business groups: **Utilities** (ATCO Gas, ATCO Electric and its subsidiaries, NLD, NUY and YECL, ATCO Pipelines, CU Water, ATCO Utility Services); **Power Generation** (ATCO Power, Alberta Power (2000)); and **Global Enterprises** (ATCO Midstream, ATCO Frontec, ATCO I-Tek and its subsidiary ATCO I-Tek Business Services, ASHCOR Technologies, Genics, ATCO Travel).
- In August 2004, ATCO Electric completed construction of a \$99.0 million, 350 kilometre 240 kilovolt transmission line between Fort McMurray and Whitefish Lake.
- In a decision dated July 13, 2004, the AEUB awarded ATCO Pipelines additional revenue with respect to the revenue forecasts of certain industrial customers.
- In July 2004, ATCO Power's Brighton Beach generating plant in Windsor, Ontario was completed and commenced commercial operations. All of ATCO Power's generating plants are now operational.
- In July 2004, the AEUB issued its generic cost of capital decision, establishing a standardized approach for determining the rate of return on common equity for each utility company (ATCO Electric, ATCO Gas and ATCO Pipelines) regulated by the AEUB. The decision also established capital structures for each utility company regulated by the AEUB. This resulted in:
 - ATCO Electric obtaining an approved 2004 return on common equity of 9.60% and a common equity ratio of 33% for its transmission operations and 37% for its distribution operations. The impact of this decision was an increase in the common equity that ATCO Electric was allowed to earn a return on by \$22.3 million in 2004.
 - ATCO Pipelines obtaining an approved 2004 rate of return on common equity of 9.60% and a common equity ratio of 43%.
 - ATCO Gas was not impacted by this decision for 2004 as its return on common equity of 9.50% and its common equity ratio of 37% had already been approved by the AEUB in a decision dated October

1, 2003. The Generic Cost of Capital decision approved, among other things, ATCO Gas' common equity ratio of 38% beginning in 2005.

- In 2001, the Corporation received and paid income tax reassessments of \$12.9 million relating to the 1996 disposal of ATCOR Resources Ltd. The Corporation did not agree with this reassessment and contested the matter with tax authorities. Accordingly, the payment was recorded as a reduction of future income tax liabilities.

During 2003, the Corporation was successful in appealing the reassessments to the Tax Court of Canada. The Federal Government appealed the Tax Court's decision to the Federal Court of Appeal, which issued a decision on June 18, 2004 in favor of the Corporation. The Federal Government did not appeal the Federal Court of Appeal's decision to the Supreme Court of Canada. The Corporation received a refund of \$15.1 million, including interest, and reversed the future income tax reduction of \$12.9 million.

- On May 4, 2004, ATCO Gas and ATCO Electric closed the transfer of their retail energy supply businesses to Direct Energy Marketing Limited and one of its affiliates (collectively "DEML"), a subsidiary of Centrica plc ("Transfer of the Retail Energy Supply Businesses") for \$90 million. The transfer increased 2004 earnings by \$55.1 million. As a result of the transfer, ATCO Gas and ATCO Electric are no longer involved in arranging for the supply and sale of natural gas and electricity to customers, but continue to own the assets and provide transportation and distribution services under AEUB approved rates that provide for a recovery of costs of service and fair return. ATCO I-Tek Business Services entered into a 10 year contract to provide billing and call centre services to DEML.

2003:

- Volatility in prices received for electricity sold to the Alberta Power Pool by ATCO Power.
- In a decision dated December 2, 2003, the AEUB approved for ATCO Pipelines, among other things, a rate of return on common equity of 9.50% and a common equity ratio of 43.5% for 2003. The decision also set aside certain transactions with affiliates that are to be finalized through a collaborative benchmarking process with customers and the AEUB. This process is still ongoing.
- In December 2003, ATCO Power's Scotford generating plant at Scotford, Alberta was completed and commenced commercial operations.
- In a decision dated October 2, 2003, the AEUB approved, among other things, a rate of return on common equity of 9.40% and a common equity ratio of 32% for ATCO Electric's transmission operations and 35% for its distribution operations for 2003. These reductions in the common equity ratios reduced the common equity that ATCO Electric was allowed to earn a return on by \$83.0 million for 2003. The decision also set aside certain transactions with affiliates that are to be finalized through a collaborative benchmarking process with customers and the AEUB. This process is still ongoing.
- In a decision dated October 1, 2003, the AEUB approved for ATCO Gas, among other things, a rate of return on common equity of 9.50% for 2003 and 2004 and a common equity ratio of 37% for 2003 and 2004. The decision also set aside certain transactions with affiliates that are to be finalized through a collaborative benchmarking process with customers and the AEUB. This process is still ongoing.
- In September 2003, ATCO Frontec's contract with the Department of National Defense to provide support services for six peace-keeping installations in Bosnia-Herzegovina expired.
- In April 2003, the AEUB determined that it would proceed with a generic cost of capital hearing to focus on the possibility of establishing a standardized approach to determine the rate of return on equity and capital structure for all utilities under the jurisdiction of the AEUB.
- In the first quarter of 2003, ATCO Gas commenced the first phase of a \$278 million project to relocate natural gas meters currently inside homes to the outside. The project will make the distribution system safer by relocating and replacing aging infrastructure, improve metering accuracy and accessibility, and

facilitate more efficient meter reading. The AEUB approved a program which will result in meters with underground entries being relocated over 10 years and all other inside meters moved as part of the existing meter recall program. The decision also allows ATCO Gas to move meters at any time if they are deemed unsafe.

- In January 2003, ATCO Power's Cory generating plant near Saskatoon, Saskatchewan was completed and commenced commercial operations.
- In January 2003, ATCO Power's Muskeg River generating plant near Fort McMurray, Alberta was completed and commenced commercial operations.

Utilities

Natural Gas Distribution

ATCO Gas is primarily engaged in the business of distributing natural gas throughout Alberta and in the Lloydminster area of Saskatchewan. Although ATCO Gas is the major natural gas distributor in Alberta, certain areas are served by other natural gas utilities.

ATCO Gas' principal markets for the distribution of natural gas are in the communities of Edmonton, Calgary, Airdrie, Camrose, Fort McMurray, Grande Prairie, Lethbridge, Lloydminster, Red Deer, St. Albert and Sherwood Park, which have a combined population of approximately 2,108,000. Also served are 279 smaller communities as well as rural areas having a combined population of approximately 558,000, located on or in the vicinity of ATCO Pipelines' transportation systems or the natural gas transportation pipelines of other companies. ATCO Gas provides approximately 940,000 customers with natural gas service, of whom approximately 75% are located in the 11 communities named above.

The number of customers served by ATCO Gas as at the end of each of the last two years was as follows:

	<u>2005</u>	<u>2004</u>
Residential	858,618	834,883
Commercial	80,630	79,084
Industrial.....	350	359
Other	-	21
Total.....	<u>939,598</u>	<u>914,347</u>

ATCO Gas owns and operates approximately 35,400 km of distribution mains. In addition, ATCO Gas owns modern service and maintenance facilities in major centres.

Revenues and earnings of ATCO Gas are affected by temperature and consequently winter weather can have a significant impact. During a typical year, more than 90% of the earnings of ATCO Gas are generated during the months of January, February, November and December.

The amounts of natural gas distributed by ATCO Gas for each of the last two years were as follows:

	<u>2005</u>	<u>2004</u>
	(petajoules)	
Residential	103.8	107.3
Commercial	96.9	98.1
Industrial.....	14.4	14.5
Other	0.4	2.8
Total.....	<u>215.5</u>	<u>222.7</u>

Natural Gas Supply

As a result of the Transfer of the Retail Energy Supply Businesses to DEML in May 2004, ATCO Gas is no longer involved in arranging for the supply and sale of natural gas to customers, but will continue to own the assets and provide transportation and distribution services under AEUB approved rates that provide for a recovery of costs of service and fair return.

Prior to April 1, 2005, as directed by the AEUB, ATCO Gas purchased fixed quantities of natural gas from various gas producers at market prices that are in effect at the time the quantities are purchased. Effective April 1, 2005, as directed by the AEUB, ATCO Gas no longer purchases fixed quantities of natural gas related to storage purchases and operational contracts pertaining to its natural gas field storage facility at Carbon, Alberta. ATCO Gas has leased the entire storage capacity of the Carbon facility to ATCO Midstream for the period April 1, 2005 to March 31, 2006. For additional information related to the leasing of the Carbon natural gas storage facility to ATCO Midstream, refer to the Regulatory Matters, ATCO Gas section of the Corporation's Management's Discussion and Analysis ("MD&A"), page 16, which is available at www.sedar.com.

In 2003, ATCO Gas commenced the first phase of a \$278 million project to relocate natural gas meters currently inside homes to the outside. The project will make the distribution system safer by relocating and replacing aging infrastructure, improve metering accuracy and accessibility, and facilitate more efficient meter reading. The AEUB approved a program which will result in meters with underground entries being relocated over 10 years and all other inside meters moved as part of the existing meter recall program. The decision also allows ATCO Gas to move meters at any time if they are deemed unsafe.

CU Water

CU Water is engaged in the transmission and distribution of water. CU Water owns and operates a distribution system to supply water to rural customers and small towns east of Edmonton. At the end of 2005, 976 customers were being served directly by CU Water and, in addition, bulk water sales were being made to the towns of Tofield and Viking and to 13 commercial water haulers. The operations of CU Water are subject to regulation by the AEUB.

Natural Gas Transportation

ATCO Pipelines is engaged in the business of transporting natural gas throughout Alberta and the operation of a salt cavern storage peaking facility.

ATCO Pipelines owns and operates extensive natural gas transportation systems. The systems consist of approximately 8,343 km of pipelines, 23 compressor sites and a salt cavern storage peaking facility. The systems have 217 producer receipt points, 78 interconnections with TransCanada Pipelines Limited, five interconnections with Alliance Pipeline and one interconnection with Many Islands Pipelines.

ATCO Pipelines' revenues are based primarily on contractual arrangements for access to its transportation systems. Contract demand for access, and interruptible (IT), overrun (OR) and variable volumes for each of the last two years was as follows:

	<u>2005</u>	<u>2004</u>
	(terajoules/day)	
Contract Demand:		
Producer.....	1,291	1,253
Industrial.....	1,015	1,054
Distribution.....	93	89
Affiliates.....	2,431	2,210
Total.....	<u>4,830</u>	<u>4,606</u>
IT/OR/Variable Volumes:		
Producer.....	243	257
Industrial.....	241	258
Distribution.....	2	7
Total.....	<u>486</u>	<u>522</u>
Total Contract Demand and IT/OR/Variable Volumes.....	<u><u>5,316</u></u>	<u><u>5,128</u></u>

The AEUB approved the conversion of sales service to transportation service for certain customers of ATCO Pipelines. This conversion was completed during 2005.

Electric Distribution and Transmission

ATCO Electric is engaged in the business of transmitting and distributing electric energy to 238 communities as well as rural areas in east-central and northern Alberta. Included are the communities of Drumheller, Lloydminster, Grande Prairie and Fort McMurray as well as the oil sands areas near Fort McMurray and the heavy oil areas near Cold Lake and Peace River. Electric utility service is also provided to one community in British Columbia and to two communities in Saskatchewan. YECL serves 19 communities in the Yukon Territory, including the capital city of Whitehorse, and NUY and NLD serve 9 communities in the Northwest Territories, including the capital city of Yellowknife.

Electricity distributed to the various classes of customers for each of the last two years was as follows:

	<u>2005</u>		<u>2004</u>	
	Millions of Kilowatt Hours	%	Millions of Kilowatt Hours	%
Industrial.....	6,583	66	6,597	67
Commercial.....	1,826	19	1,796	18
Residential.....	1,023	10	1,032	10
Rural, REAs and other.....	494	5	485	5
Total.....	<u>9,926</u>	<u>100</u>	<u>9,910</u>	<u>100</u>

The aggregate population of the areas provided with electric utility service by ATCO Electric, NUY, NLD and YECL is approximately 456,000 and service is provided to approximately 211,000 customers. ATCO Electric has been assigned approximately 65% of the designated service area within Alberta which contains approximately 15% of the existing provincial electrical load and 13% of the existing population.

The number of customers served by ATCO Electric, NUY, NLD and YECL as at the end of each of the last two years was as follows:

	2005		2004	
	Number	%	Number	%
Industrial.....	10,847	5	10,691	5
Commercial	28,673	14	28,068	14
Residential	141,806	67	138,066	67
Rural, REAs and other.....	29,536	14	29,421	14
Total.....	<u>210,862</u>	<u>100</u>	<u>206,246</u>	<u>100</u>

ATCO Electric, NUY, NLD and YECL own and operate extensive electric transmission and distribution systems. The systems consist of approximately 9,400 km of main transmission lines and 59,800 km of distribution lines. In addition, ATCO Electric delivers power to and operates approximately 12,100 km of REA-owned distribution lines.

ATCO Electric, NUY, NLD and YECL own and operate 33 diesel, natural gas turbine and hydro generating plants having an aggregate nameplate capacity of 62 megawatts in Alberta and in the Yukon and Northwest Territories. The maximum peak load demand for these plants during the year ended December 31, 2005, was 32 megawatts.

Franchises

AGP, ATCO Electric, YECL, NUY and NLD distribute natural gas and electricity in incorporated communities under the authority of franchises or by-laws and in rural areas under approvals, permits or orders issued pursuant to applicable statutes.

In Edmonton, distribution of natural gas is carried on under the authority of an exclusive franchise. In 2004, AGP entered into an agreement with the City of Edmonton for a 10 year renewal of the franchise to November 15, 2015. The franchise renewal is subject to the right of the City of Edmonton, at the end of the renewal period, to purchase all of AGP's assets within the city and its assets outside the city used in supplying natural gas to the city. The purchase price would be the amount of the actual value thereof as a going concern plus 10% of such value. Although the franchise agreement gives the City certain rights of purchase, since 1935 the City has granted renewals for 10 year periods.

In Calgary, distribution of natural gas is carried on under the authority of a municipal by-law. The rights of AGP under this by-law, while not exclusive, are unrestricted as to time. The by-law does not confer any right on the City of Calgary to acquire the facilities used in providing the service.

The franchises under which service is provided in other incorporated communities in Alberta and in the Northwest Territories have been granted for periods of up to 20 years. These franchises are exclusive to AGP, ATCO Electric, NUY or NLD and are renewable by agreement for further periods not exceeding 20 years each in the case of AGP and 10 years in the case of ATCO Electric, NUY and NLD. If any franchise is not renewed, it remains in effect until such time as either party, with the approval of the prevailing regulatory authority, terminates it on six months written notice. Upon termination of a franchise the municipality may purchase the facilities used in connection with that franchise at a price to be agreed upon or, failing agreement, to be fixed by the prevailing regulatory authority. The franchise under which service is provided in the Yukon Territory was granted under the Public Utilities Act (Yukon Territory) and has no set expiry date.

Power Generation

Power generation operations are conducted by Alberta Power (2000) and ATCO Power.

Regulated (Alberta Power (2000))

Alberta Power (2000) is engaged in the regulated supply of electricity in Alberta. Alberta Power (2000)'s assets are operated by ATCO Power pursuant to management agreements. The generating plants of Alberta Power (2000) were regulated by the AEUB until December 31, 2000, but are now governed by legislatively mandated PPA's that

were approved by the AEUB. These plants are included in regulated operations primarily because the PPA's are designed to allow the owners of generating plants constructed before January 1, 1996, to recover their forecast fixed and variable costs and to earn a return at the rate specified in the PPA's. The plants will become deregulated upon the expiry of the PPA's. Each PPA is to remain in effect until the earlier of the last day of the life of the related generating plant and December 31, 2020.

Substantially all of the electricity generated by Alberta Power (2000) is sold pursuant to PPA's with EPCOR Utilities Inc. (Battle River generating plant) and TransCanada Energy Ltd. (Sheerness generating plant). The Sheerness PPA was sold to TransCanada Energy Ltd. by the Alberta Balancing Pool effective January 1, 2006 and the Rainbow PPA expired on December 31, 2005. Under the PPA's, Alberta Power (2000) is required to make the generating capacity for each generating unit available to the purchaser of the PPA for that unit. In return, Alberta Power (2000) is entitled to recover its forecast fixed and variable costs for that unit from the PPA purchaser, including a return on common equity equal to the long term Government of Canada bond rate plus 4.5% based on a deemed common equity ratio of 45%. Many of the forecast costs will be determined by indices, formulae or other means for the entire period of the PPA. Alberta Power (2000)'s actual results will vary and depend on performance compared to the forecasts on which the PPA's are based.

Alberta Power (2000) continues to operate the Rainbow and Sturgeon generating plants and the electricity generated is sold to the Alberta Power Pool. Alberta Power (2000) has one year from the expiry of the PPA's to determine whether to decommission the plants or continue operating them. To date, no decision has been made with respect to the ongoing status of these plants.

The name plate capacity ratings of Alberta Power (2000)'s generating plants as at December 31, 2005 are listed below.

<u>Plant</u>	<u>Commissioning Date</u>	<u>Type of Generating Plant</u>	<u>Name Plate Capacity Rating</u> (megawatts)	<u>PPA Purchaser</u>	<u>PPA Expiry Date</u>
Battle River					
Unit 3	1969	coal-fired steam turbine	150	EPCOR Utilities Inc.	2013
Unit 4	1973	coal-fired steam turbine	150	EPCOR Utilities Inc.	2013
Unit 5	1981	coal-fired steam turbine	370	EPCOR Utilities Inc.	2020
			<u>670</u>		
Sheerness (1)(2)					
Unit 1	1986	coal-fired steam turbine	190	TransCanada Energy Ltd.	2020
Unit 2	1991	coal-fired steam turbine	190	TransCanada Energy Ltd.	2020
			<u>380</u>		
Rainbow (3)....	1968	natural gas turbine	88		2005
Sturgeon.....	1957	natural gas turbine	18	Merchant	
Total			<u>1,156</u>		

Note:

(1) Alberta Power (2000)'s ownership of the 760 megawatt name plate capacity.

(2) TransCanada Energy Ltd. became the PPA purchaser on January 1, 2006; previously the PPA purchaser was the Alberta Balancing Pool.

(3) PPA expired December 31, 2005.

Alberta Power (2000) manages the Sheerness generating plant under long term agreements with TransAlta Cogeneration L.P. for the equal sharing of ownership and cost of electric capacity.

Alberta Power (2000) owns or has committed under long term contracts sufficient coal supplies for the anticipated lives of its Battle River and Sheerness generating plants.

Non-Regulated (ATCO Power)

ATCO Power is engaged in the non-regulated supply of electricity and cogeneration steam in Canada, the United Kingdom and Australia. ATCO Power also manages Alberta Power (2000)'s assets. ATCO Power continues to focus its development efforts on independent power production projects in Canada, Australia and the United Kingdom.

ATCO Power's non-regulated independent cogeneration plants and generating plants, with their respective commissioning dates and name plate capacity ratings, are shown below.

<u>Location</u>	<u>Commissioning Date</u>	<u>Name Plate Capacity Rating</u> (megawatts)	<u>Ownership</u>	<u>Net Ownership</u> (megawatts)
<i>Canada:</i>				
McMahon, B.C.	1993	120	50.0%	60
Primrose, Alberta	1998	85	40.0%	34

Total		<u>3,304</u>		<u>1,318</u>

Canada

ATCO Power has a 50% interest in a joint venture with McMahon Power Holdings L.P. The joint venture owns and operates the 120 megawatt McMahon cogeneration plant at Taylor, British Columbia. All of the electricity generated is sold to British Columbia Hydro and Power Authority pursuant to an electricity purchase agreement expiring in 2014. In addition to generating electricity, the plant sells steam to Westcoast Energy Inc.'s adjacent natural gas processing plant.

A joint venture, owned by ATCO Power, Canadian Natural Resources Limited ("CNRL") and ATCO Resources, operates an 85 megawatt cogeneration power plant (the "Primrose Steam Enhancement Plant") near Bonnyville, Alberta. The joint venture sells electricity and steam to CNRL for use in its heavy oil recovery process. Any excess electricity generated is sold to the Alberta Power Pool or to specific customers. ATCO Power owns a 40% interest in the project, ATCO Resources owns 10% and CNRL owns 50%.

ATCO Power operates a 45 megawatt natural gas-fired generating plant at Poplar Hill near Grande Prairie, Alberta. Revenues are derived from power sold to the Alberta Power Pool and from transmission deferral credits contracted with the Alberta Power Pool. ATCO Power owns an 80% interest in the project and ATCO Resources owns 20%.

ATCO Power operates a 90 megawatt natural gas-fired generating plant at Rainbow Lake, Alberta which sells steam and electricity to Husky Energy Inc. (“Husky”). Surplus electricity is sold to the Alberta Power Pool. ATCO Power owns a 40% interest in the project, ATCO Resources owns 10% and Husky owns 50%.

ATCO Power, EPCOR Power Development Corporation and NOVA Chemicals Corporation (“NOVA”) are participants in a joint venture which operates a 480 megawatt natural gas-fired cogeneration plant near Joffre, Alberta. ATCO Power is the operator of the facility. NOVA purchases all of the steam and approximately 25% of the electricity produced for use in NOVA’s Joffre petrochemical site under an energy purchase agreement expiring in 2020. The balance of the output is sold to the Alberta Power Pool or to specific customers. ATCO Power owns a 32% interest in the project, ATCO Resources owns 8%, EPCOR Power Development Corporation owns 40% and NOVA owns 20%.

ATCO Power operates a 45 megawatt natural gas-fired generating plant near Valleyview, Alberta. All of the electricity produced by the plant is sold to the Alberta Power Pool. ATCO Power owns an 80% interest in the project and ATCO Resources owns 20%.

ATCO Power and SaskPower International Inc. (“SPI”) are participants in a joint venture which operates a 170 megawatt natural gas-fired cogeneration plant and related facilities at the Athabasca Oil Sands Project (“AOSP”) Muskeg River mine near Fort McMurray, Alberta. Approximately one-half of the electricity and all of the steam produced by the plant are supplied to AOSP for use in its Muskeg River mine. The balance of the electricity generated is sold to the Alberta Power Pool. ATCO Power owns a 56% interest in the project, ATCO Resources owns 14% and SPI owns 30%.

ATCO Power and SPI are participants in a joint venture which operates a 260 megawatt natural gas-fired cogeneration plant at Potash Corporation of Saskatchewan Inc.’s Cory Mine, located near Saskatoon, Saskatchewan. ATCO Power is the operator of the facility. Saskatchewan Power Corporation has agreed to purchase all of the electricity generated by the plant for 25 years. ATCO Power owns a 40% interest in the project, ATCO Resources owns 10% and SPI owns 50%.

ATCO Power operates a 32 megawatt hydroelectric generating plant at the Oldman River dam near Pincher Creek, Alberta. All of the electricity produced by the plant is sold to the Alberta Power Pool. ATCO Power owns an 80% interest in the project and ATCO Resources owns 20%. The Piikani Nation of Brockett, Alberta has an option which expires March 31, 2006, to purchase a 25% interest in the project.

ATCO Power operates a 170 megawatt natural gas-fired cogeneration plant at the AOSP upgrader at Scotford, Alberta. Approximately 80% of the electricity and all the thermal energy produced by the plant is supplied to AOSP for use in the upgrader and the balance of the electricity is sold to the Alberta Power Pool. ATCO Power owns an 80% interest in the project and ATCO Resources owns 20%.

A partnership formed by ATCO Power and Ontario Power Generation (“OPG”) owns and operates the Brighton Beach power plant, a 580 megawatt natural gas-fired combined cycle generating plant in Windsor, Ontario. Coral Energy Canada Inc. supplies and pays for the natural gas used at the plant and owns, markets and trades all the electricity produced under contracts expiring in 2024. ATCO Power owns a 40% interest in the project, ATCO Resources owns 10% and OPG owns 50%.

At December 31, 2005, all of ATCO Power’s non-regulated independent generating plants were in service.

United Kingdom

ATCO Power and Balfour Beatty plc, a United Kingdom construction group, each own a 50% equity interest in Thames Power, a London, England based company. Thames Power has a 51% interest in BPL which owns a 1,000 megawatt natural gas-fired combined cycle generating plant at Dagenham in London, England (the “Barking power plant”). EDF Energy plc (“EDF”) and SSE Energy Supply Limited (“SSE”) own the remaining 49% interest in BPL. EDF and SSE have entered into long term agreements expiring in 2010 to purchase 72.5% of the electricity produced at the plant. The remaining 275 megawatts of power is being sold into the United Kingdom electricity market on a merchant basis under a one year marketing agreement expiring September 30, 2006. The majority of

the 275 megawatts has been sold forward under this agreement through the end of March 2006 with smaller volumes sold forward through September 2006. The Barking power plant is operated by ATCO Power.

ATCO Power has a 50% interest in a joint venture with a subsidiary of EDF. The joint venture owns and operates a facility consisting of a 14 megawatt natural gas turbine, 40 megawatts of boiler capacity and an associated heat distribution system at London's Heathrow Airport. The joint venture has a 15 year energy services contract, expiring in 2010, with BAA plc, owner of the Heathrow Airport, for all of the electric energy and hot water produced by the facility.

Australia

ATCO Power has a 50% interest in a joint venture with Origin Energy Limited ("Origin"). The joint venture owns and operates a 180 megawatt cogeneration plant in Osborne, South Australia. This joint venture supplies electricity to Flinders Osborne Trading Pty Ltd ("FOT") under a 20 year electricity purchase agreement expiring in 2018. In addition to generating electricity, the plant provides steam under a 20 year agreement, expiring in 2018, to Penrice Soda Products Pty Ltd. The Government of South Australia has guaranteed the obligations of FOT under these agreements.

ATCO Power has a 50% interest in a consortium with Origin. The consortium owns and operates a 33 megawatt natural gas-fired cogeneration plant and other utility infrastructure at BP Amoco plc's ("BP") Bulwer Island refinery, near Brisbane, Queensland. All of the power and steam produced by the plant is sold to BP under a 20 year agreement expiring in 2021.

Global Enterprises

Non-Regulated Natural Gas Gathering, Processing and Storage

ATCO Midstream owns and operates non-regulated gathering and processing facilities in Alberta. ATCO Midstream provides natural gas procurement/load balancing services for other ATCO subsidiaries, management services for ATCO Gas' storage field at Carbon and markets non-regulated storage products. Effective April 1, 2005, ATCO Midstream leased the full storage capacity at ATCO Gas' Carbon storage facility for the period April 1, 2005 to March 31, 2006. Upon the Transfer of the Retail Energy Supply Businesses in 2004, ATCO Midstream ceased providing natural gas procurement services to ATCO Gas.

ATCO Midstream owns a 51.3% interest in EEEP. Located in south Edmonton, EEEP is a natural gas processing plant which extracts ethane and other natural gas liquids from natural gas flowing into the Edmonton market area. Ethane is sold to an Alberta ethylene producer under a long term contract that expires in December 2012 and other natural gas liquids are sold under another long term contract that expires in May 2014.

ATCO Midstream's natural gas liquids extraction plants with plant capacity ratings are shown below:

Facility	Extraction	Plant Capacity (Mmcf/day)	Ownership	Net Ownership (Mmcf/day)
Edmonton Ethane Extraction Plant	C2 & C3+ NGL mix	360	51.3%	185
Empress Gas Liquids Straddle Plant (3)	C2 & C3+ NGL mix	1,100	12.2%	134
Golden Spike Gas Plant	C2+NGL mix	40	100.0%	40
Villeneuve Ethane Extraction Plant	C2+NGL mix	40	100.0%	40
Fort Saskatchewan Ethane Extraction Plant	C2+NGL mix	35	100.0%	35
		<u>1,575</u>		<u>434</u>

Note:

- (1) Propane, butane and pentanes-plus ("C3") and a mixture of ethane and other natural gas liquids ("NGL").
- (2) Ethane ("C2") and a mixture of other NGL's.
- (3) Operated by ATCO Midstream.

ATCO Midstream owns or has a joint venture interest in eight natural gas processing plants, five of which it operates, three compression facilities, all of which it operates, and approximately 1,000 km of field gathering lines. Natural gas production from the producing properties connected to ATCO Midstream's natural gas gathering systems is processed by ATCO Midstream and either transported for a fee or purchased and sold under contracts with third parties.

ATCO Midstream's natural gas processing plants with plant capacity ratings are shown below:

Facility	Plant Capacity (Mmcf/day)	Operator
Carbondale.....	55	Yes
Cranberry / Chinchaga Complex	124	No
Golden Spike	65	Yes
Nottingham Gas Plant.....	13	No
Puskwaskau Gas Plant.....	21	No
Watelet Gas Plant	21	Yes
West Pembina Gas Plant.....	145	Yes
Widewater Gas Plant	7	Yes
	<u>451</u>	

ATCO Midstream has an agreement for natural gas storage capacity at ATCO Gas' Carbon natural gas storage facility in Alberta. ATCO Midstream utilizes this capacity to provide storage services to third parties.

Technical Facilities Management

ATCO Frontec, through its own operations and through a number of joint ventures, provides project management and technical services for customers in the industrial, defence, telecommunications and transportation sectors. Activities include the operation and maintenance of the Alaska Radar System, the Solid State Phased Array Radar System and various remote sites for Northwestel Inc. in northern Canada. ATCO Frontec provides construction, site support and technical support for NATO in Afghanistan, Pakistan and eastern Europe. ATCO Frontec also provides airport operation and maintenance, security, facilities management, bulk fuel storage and distribution and a wide variety of services and business activities in various locations throughout Canada and the world.

ATCO Frontec and Pan Arctic Inuit Logistics Corporation ("Pan Arctic") have a contract with the Government of Canada, until September 2006, to operate and maintain the North Warning System. The Government of Canada has an option to extend the contract until 2011. Nasittuq Corporation, a corporation jointly owned by ATCO Frontec and Pan Arctic, operates as agent for the purposes of the contract.

Technologies

ATCO I-Tek is engaged in the development, operation and support of information systems and technologies.

ATCO I-Tek Business Services provides billing services, payment processing, credit, collection and call centre services to its clients. ATCO I-Tek Business Services currently provides such services to DEML for its regulated retail and competitive energy supply businesses in Alberta. In addition, ATCO I-Tek Business Services also supplies distribution-related billing and customer care services to ATCO Gas and ATCO Electric.

DEML has entered into a 10 year contract effective May 4, 2004, with ATCO I-Tek Business Services to provide billing and call centre services to ensure continued quality customer service. DEML has the ability to terminate this contract after the fifth anniversary upon immediate payment of termination fees which decline over the remaining term of the contract. Based upon current customer counts and service levels and a 10 year contract, revenues are estimated to be between \$400-\$500 million over the term of the contract.

ASHCOR Technologies is engaged in the sale of fly ash and other combustion byproducts produced in coal-fired electrical generating plants.

ATCO Travel is engaged in the sale of travel services to both business and consumer sectors. ATCO Travel is one of the largest independent travel agencies in western Canada.

The Corporation owns a 50% interest in the shares of Genics, a manufacturer of wood preservation products.

BUSINESS RISKS

The business risks section on pages 20 to 24 of the Corporation's Management's Discussion and Analysis ("MD&A") is hereby incorporated by reference and is available at www.sedar.com.

GOVERNMENT REGULATION

Under Alberta legislation, owners of public, electric or gas utilities are required to obtain AEUB approval prior to issuing securities. CU and CU Inc. are considered to be owners, but have obtained from the AEUB orders which exempt them from this requirement.

The utility operations of the Corporation in Alberta (ATCO Gas, ATCO Electric, ATCO Pipelines and CU Water) are subject to the jurisdiction of the AEUB which, among other things, is vested with broad general powers of supervision with respect to the construction and operation of electric energy and natural gas facilities within the Province and broad powers of regulation in respect of rates charged for the delivery of electric energy, natural gas and water.

The AEUB approves customer rates based on anticipated energy deliveries as well as the revenue required to recover estimated costs of service, including a fair return on rate base, estimated operating expenses, depreciation and taxes, all in respect of a future test period. Energy deliveries are based on a forecast of economic and business conditions and, in the case of natural gas utility operations, normal temperature which is defined as the average temperature for the previous 20 years.

Rate base consists of the depreciated cost of utility assets and an allowance for working capital. Return on rate base is designed to meet the cost of interest on long term debt and dividends on preferred shares and to provide the common shareholders with a reasonable opportunity to earn a fair return on their investment. The determination of a fair return to the common shareholders involves an assessment by the AEUB of many factors, including returns on alternative investment opportunities of comparable risk and the level of return which will enable a utility to attract the necessary capital to fund its operations.

The EUA and the GUA grant the AEUB specific authority to approve customer rates that provide incentives for efficiencies that result in cost savings or other benefits that can be shared in an equitable manner between a utility and its customers. Final determination of such customer rates requires the approval of the AEUB.

The regulated operations of the Corporation in the Yukon Territory (YECL) and the Northwest Territories (NUY and NLD) are subject to regulation similar to that in effect in Alberta by regulatory authorities in those jurisdictions.

Particulars of the most recent final decisions made by the AEUB respecting general rate applications or negotiated settlements filed by the principal regulated subsidiaries of the Corporation are as follows:

	<u>Year</u>	<u>Date of Decision (1)</u>	<u>Mid-Year Rate Base</u> (\$ Millions)		<u>Rate of Return on Common Equity (2)</u> (%)		<u>Common Equity Ratio (3)</u> (%)	
ATCO Electric								
Transmission	2003	Oct. 02/03	672.0		9.40		32.0

	2007	Jan. 27/06	549.9	(5)	8.93	(6)	38.0	(6)

Notes:

- (1) The information shown reflects the most recent amending or varying orders issued subsequent to the original date of decision.
- (2) Common equity rate of return is the rate of return on the portion of rate base considered to be financed by common equity.
- (3) The common equity ratio is the percentage of rate base considered to be financed by common equity.
- (4) The rate of return on common equity and common equity ratio for 2004 for ATCO Electric and ATCO Pipelines was determined by the AEUB's generic cost of capital decision dated July 2, 2004.
- (5) Amounts shown for mid-year rate base are based on the AEUB 2005, 2006, and 2007 general rate application decision issued in January 2006. These amounts will be updated based on the compliance filing due to the AEUB on March 17, 2006.
- (6) The common equity ratios for 2005 – 2007 for ATCO Gas were determined by the AEUB's generic cost of capital decision dated July 2, 2004. The 2005, 2006, 2007 general rate application decision issued by the AEUB in January 2006 approved a return on common equity as determined by the AEUB's standardized rate of return methodology. The return on common equity is 9.5% in 2005, 8.93% in 2006, and is yet to be determined for 2007 and as such the 2007 rate of return on common equity is a placeholder.

Generic Cost of Capital

In July 2004, the AEUB issued its generic cost of capital decision. The decision established a standardized approach for each utility company regulated by the AEUB for determining the rate of return on common equity based upon a return of 9.60% on common equity. This rate of return will be adjusted annually by 75% of the change in long term Government of Canada bond yield as forecast in the November Consensus Forecast, adjusted for the average difference between the 10 year and 30 year Government of Canada bond yields for the month of October as reported in the National Post. This adjustment mechanism is the same as the National Energy Board uses in determining its

formula based rate of return. The AEUB will undertake a review of this mechanism for the year 2009 or if the rate of return resulting from the formula is less than 7.6% or greater than 11.6%. The AEUB also noted that any party, at any time, could petition for a review of the adjustment formula if that party can demonstrate a material change in facts or circumstances.

The decision also established the appropriate capital structure for each utility regulated by the AEUB. The AEUB determined that any proposed changes to the approved capital structure which result from a material change in the investment risk of a utility will be addressed at utility specific rate applications.

In November 2004, the AEUB announced a generic return on common equity of 9.50% for 2005 and in November 2005 announced a generic return on common equity of 8.93% for 2006. In January 2006, the AEUB clarified that the generic return on equity determined in accordance with the generic cost of capital decision should apply to each year of the test period in the companies' applications. If no rate applications are filed for a particular year, then there will be no adjustment to the common equity rate of return for that year.

Gas Utilities Act

Under the GUA, the customers served by ATCO Gas have the choice of purchasing their natural gas supplies at a regulated rate provided by DEML or directly from retailers, subject to certain conditions.

As a result of the Transfer of the Retail Energy Supply Businesses to DEML in May 2004, ATCO Gas is no longer involved in arranging for the supply and sale of natural gas to customers, but continues to own the assets and provide transportation and distribution services under AEUB approved rates that provide for a recovery of costs of service and fair return.

Electric Utilities Act

The EUA provides the framework for a new structure in Alberta's electric utility industry and introduces competition into the electric utility business. As of January 1, 2001, new generation was completely deregulated and retail competition was introduced. In August 2002, the Government of Alberta announced further changes to utility legislation in order to improve the environment for retail competition in the Province. Amendments to the EUA and GUA received Royal Assent in March 2003 and were proclaimed in force in June 2003. These changes were designed to bring customer choice for both gas and electricity into closer alignment, as well as to move towards consistent regulatory treatment of investor-owned and municipally-owned utilities.

ATCO Electric continues to have the responsibility to provide the regulated rate tariff to the residential, farm and small commercial customers in its designated service area who do not choose an energy retailer. As a result of the Transfer of the Retail Energy Supply Businesses to DEML in May 2004, ATCO Electric is no longer involved in arranging for the supply and sale of electricity to customers and is therefore no longer at risk for electric energy supply. ATCO Electric continues to own the assets and provide transmission and distribution services under AEUB approved rates that provide for a recovery of the cost of service, including a fair return on rate base.

It is anticipated that ATCO Electric's transmission and distribution activities will continue to be regulated by the AEUB.

New Generation (ATCO Power)

Under the EUA, generation assets constructed after December 31, 1995, are not considered part of utility operations and rates are not regulated by the AEUB. All owners of new and existing generating units must sell their surplus electric energy through the Alberta Power Pool.

Existing Generation (Alberta Power (2000))

The EUA provided for the equalization of costs of "existing generation" that was in service at December 31, 1995. On January 1, 2001, existing generation became subject to legislatively mandated PPA's approved by the AEUB. The PPA's are designed to allow the owners of generating plants constructed before January 1, 1996, to recover their forecast fixed and variable costs and to earn a return at the rate specified in the PPA's. The plants will become

deregulated upon the expiry of the PPA's. Each PPA is to remain in effect until the earlier of the last day of the life of the related generating plant and December 31, 2020.

Transmission

Under the EUA, separate wholesale tariffs for transmission must be approved by the AEUB. The transmission tariffs allow any owner of a generating unit to have access to the transmission system in Alberta and thus facilitate the sale of its power. The same transmission tariff is charged to each distribution utility or customer directly connected to the transmission system regardless of location.

The equalization of transmission costs is achieved by having each owner of transmission facilities charge its costs to the Alberta Power Pool. The Alberta Power Pool then aggregates these costs and charges a common transmission rate to all who use the transmission system.

The Alberta Power Pool has developed and approved rules as mandated in the Transmission Regulation enacted by the Government of Alberta in 2004. These rules direct that new transmission projects will be assigned to the Transmission Facility Owners based on the service areas of the distribution companies they have been historically affiliated with. Ownership of facilities will change at service area boundaries except where, in the opinion of the Alberta Power Pool, only a small portion of the project is in another service area. All expansions of existing facilities will be assigned to the existing owner.

Distribution

Under the EUA, separate retail rates for distribution must be approved by the AEUB. Costs of distribution are not equalized. The distribution utility provides the distribution services for all customers under AEUB approved tariffs which provide for the recovery of the cost of service, including a fair return on rate base.

Environmental Protection

The Corporation's operating subsidiaries and the industries in which they operate are subject to extensive federal, provincial and local environmental protection laws concerning emissions to the air, discharges to surface and subsurface waters, land use activities and the handling, manufacturing, processing, use, emission and disposal of materials and waste products. In Alberta, protection of the environment is generally governed by the Alberta Environmental Protection and Enhancement Act. The operating subsidiaries have obtained or are obtaining all permits and licenses required by law to carry on their operations.

The Corporation's operating subsidiaries are committed to preserving and protecting the environment and minimizing the discharge of harmful materials into the environment in accordance with environmental protection laws and regulations. Nevertheless, some risk of unintentional violation of environmental protection laws and the resulting liability to the Corporation's operating subsidiaries is inherent in particular operations of these subsidiaries, as it is with other companies engaged in similar businesses. There can be no assurance that material costs and liabilities will not be incurred. To mitigate these costs, the Corporation carries insurance for the operating subsidiaries against third party claims for bodily injury and property damage arising from a sudden and accidental event or occurrence resulting from an unexpected release of pollutants or contaminants.

The Corporation's operating subsidiaries do not expect that environmental protection laws and regulations will affect them differently from other companies in the industries in which they operate. Specifically identifiable expenditures for pollution abatement and control were approximately \$24.3 million in 2005 and are estimated to be \$29.6 million in 2006. Costs of compliance with existing laws and regulations are not expected to have a material impact on the earnings of the Corporation or the competitive position of the operating subsidiaries.

DESCRIPTION OF CAPITAL STRUCTURE

Two for One Share Split

In July 2005, the Corporation's Board of Directors approved a two-for-one share split of the outstanding Class A and Class B Shares. The share split took the form of a stock dividend whereby share owners received one additional Class A Share for each Class A Share held as of the record date and one additional Class B Share for each Class B Share held as of the record date. The stock dividend was paid on September 15, 2005 to share owners of record at the close of business on August 29, 2005. All share, stock option and per share amounts have been retroactively restated to reflect this share split.

Share Capital

The authorized share capital of the Corporation consists of 150,000 Series Preferred Shares issuable in series, an unlimited number of Series Second Preferred Shares issuable in series and an unlimited number of Class A Shares and Class B Shares. At February 21, 2006, the Corporation had outstanding:

- no Series Preferred Shares;
- nine series of Series Second Preferred Shares totaling 25,460,105 shares (\$636.5 million);
- 82,939,286 Class A Shares; and
- 44,016,284 Class B Shares.

Series Preferred Shares

The Series Preferred Shares are entitled, in priority to the Series Second Preferred Shares and the Class A Shares and Class B Shares, to fixed cumulative preferential cash dividends and, in the event of the liquidation, dissolution or winding-up of the Corporation, or other distribution of assets of the Corporation among its shareholders for the purpose of winding up its affairs, to the amount paid up thereon and accrued and unpaid dividends and, if such action is voluntary, the premiums payable on redemption, if any.

The Series Preferred Shares are subject to redemption on 30 days' notice and are non-voting except upon the failure of the Corporation to pay dividends on any such shares for a period of 18 months, in which case the holders of all such shares are entitled to one vote per share and to elect at meetings of shareholders at which directors are elected just under one-half of the directors of the Corporation.

The provisions attaching to the Series Preferred Shares stipulate that no shares ranking junior to the Series Preferred Shares may be retired unless all dividends then payable on the Series Preferred Shares shall have been declared and paid.

Two series of Series Preferred Shares aggregating 65,000 shares have been designated and issued to date, all of which have been redeemed and cancelled.

Series Second Preferred Shares

An unlimited number of Series Second Preferred Shares are issuable in series, each series consisting of such number of shares and having such provisions attaching thereto as may be determined by the directors. The Series Second Preferred Shares as a class have, among others, provisions to the following effect:

- (i) The Series Second Preferred Shares rank junior to the Series Preferred Shares but are, with respect to priority in payment of dividends and in the distribution of assets in the event of liquidation, dissolution or winding up of the Corporation, entitled to preference over the Class A Shares and the Class B Shares and any other shares of the Corporation ranking junior to the Series Second Preferred Shares. The Series Second Preferred Shares may also be given such other preference over the Class A Shares and the Class B Shares and any other junior shares as may be determined for any series authorized to be issued.
- (ii) The Series Second Preferred Shares of each series rank equally with the Series Second Preferred Shares of every other series with respect to priority in payment of dividends and in the distribution of assets in the event of liquidation, dissolution or winding up of the Corporation.

- (iii) The holders of the Series Second Preferred Shares are not entitled as such (except as provided in any series) to any voting rights nor to receive notice of or to attend shareholders' meetings unless dividends on the Series Second Preferred Shares of any series are in arrears to the extent of eight quarterly dividends or four half-yearly dividends, as the case may be, whether or not consecutive. Until all arrears of dividends have been paid, such holders will be entitled to receive notice of and to attend all shareholders' meetings at which directors are to be elected (other than separate meetings of holders of another class of shares) and to one vote in respect of each Series Second Preferred Share held.

The following Series Second Preferred Shares are currently outstanding:

	Stated Value (dollars)	Redemption Dates (1)	2005	
			Shares	Amount (millions of dollars)
Cumulative Redeemable Second Preferred Shares				
5.9% Series Q	\$25.00	Open	2,277,675	56.9

				636.5

Notes:

- (1) The preferred shares, except for the Series W and X, are redeemable on the dates specified above at the option of the Corporation at the stated value per share plus accrued and unpaid dividends.
- (2) The Series W preferred shares are redeemable commencing on March 1, 2008 at the stated value per share plus a 4% premium for the next 12 months plus accrued and unpaid dividends. The redemption premium declines by 1% in each succeeding 12 month period until March 1, 2012.
- (3) The Series X preferred shares are redeemable commencing June 1, 2008 at the stated value per share plus a 4% premium for the next 12 months plus accrued and unpaid dividends. The redemption premium declines by 1% in each succeeding 12 month period until June 1, 2012.
- (4) The dividends payable on the Series O, T, U and V preferred shares are fixed until the redemption dates specified above, at which time a new dividend rate may be established by negotiations between the Corporation and the owners of the shares.

Class A Shares and Class B Shares

The owners of the Class A Shares and the Class B Shares are entitled to share equally, on a share for share basis, in all dividends declared by the Corporation on either of such classes of shares as well as the remaining property of the Corporation upon dissolution. The owners of the Class B Shares are entitled to vote and to exchange at any time each share held for one Class A Share.

If a take-over bid is made for the Class B Shares, which would result in the offeror owning more than 50% of the outstanding Class B Shares and which would constitute a change in control of the Corporation, owners of Class A Shares are entitled, for the duration of the bid, to exchange their Class A Shares for Class B Shares and to tender such Class B Shares pursuant to the terms of the take-over bid. Such right of exchange is conditional upon the completion of the take-over bid giving rise to the right of exchange, and if the take-over bid is not completed, then the right of exchange shall be deemed never to have existed. In addition, owners of the Class A Shares are entitled to exchange their shares for Class B Shares of the Corporation if ATCO Ltd., the present controlling share owner of the Corporation, ceases to own or control, directly or indirectly, more than 20,000,000 of the issued and outstanding

Class B Shares of the Corporation. In either case, each Class A Share is exchangeable for one Class B Share, subject to changes in the exchange ratio for certain events such as a stock split or rights offering.

DIVIDENDS

Cash dividends declared during the past three years for all series and classes of preferred and common shares are as follows:

	Year Ended December 31		
	2005	2004	2003
	(\$ per share)		
Cash dividends declared per share:			
Series Second Preferred Shares:			
Series O	1.26	1.26	1.26
Series Q	1.48	1.48	1.48
Series R	1.33	1.33	1.33
Series S	1.65	1.65	1.65
Series T	1.26	1.26	1.26
Series U	1.26	1.26	1.26
Series V	1.31	1.31	1.31
Series W (1).....	1.45	1.45	1.44
Series X (2)	1.50	1.50	0.93
 Class A and Class B Shares	 1.10	 1.06	 1.02

Notes:

- (1) Issued December 3, 2002.
- (2) Issued April 17, 2003.

It is the policy of the Corporation to pay dividends quarterly on its Class A and Class B Shares. In 2005, the Corporation increased the dividends on Class A and Class B Shares by \$0.04 per share, the same increase as in 2004. The Corporation has increased its annual common share dividend each year since its inception as a holding company in 1972. The matter of an increase in the quarterly dividend is addressed by the Board of Directors in the first quarter of each year. For the first quarter of 2006, the quarterly dividend payment has been increased by \$0.01 to \$0.285 per share. The payment of any dividend is at the discretion of the Board of Directors and depends on the financial condition of the Corporation and other factors.

CREDIT RATINGS

The current credit ratings on the Corporation's and CU Inc.'s securities are as follows:

	DBRS (1)	S&P (2)
Canadian Utilities Limited:		
Debentures	A	A-
Commercial paper	R-1 (low)	A-1 (mid)
Preferred Shares:		
Obligations of CU Inc. (3).....	Pfd-2 (high)	P-2 (high)
Obligations of CU	Pfd-2	P-2 (high)
 CU Inc.:		
Debentures	A (high)	A
Commercial paper	R-1 (low)	A-1 (mid)
Preferred Shares	Pfd-2 (high)	Not rated

Notes:

- (1) Dominion Bond Rating Service Limited (“DBRS”) maintains a stable trend on the above securities.
- (2) Standard and Poor’s (“S&P”) maintains a stable trend on the above securities.
- (3) Refers to the Cumulative Redeemable Second Preferred Shares Series Q, R and S and the Perpetual Cumulative Second Preferred Shares Series U and V which were issued by Canadian Utilities Limited prior to the creation of CU Inc. on March 12, 1999.

Long Term Debt Credit Ratings

An A rating by DBRS is the third highest of ten categories. Long term debt rated A is of satisfactory credit quality. Protection of interest and principal is still substantial but the degree of strength is less than that of AA rated entities. While A is a respectable rating, entities in this category are considered to be more susceptible to adverse economic conditions and have greater cyclical tendencies than higher-rated securities. “High” and “low” grades may be used to indicate the relative standing of a credit within a particular rating category.

An A rating by S&P is the third highest of eleven categories. Obligations rated A by S&P are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories, however, the obligor’s capacity to meet its financial commitment on the obligations is still strong. The addition of a plus or minus sign shows relative standing within the rating categories.

Commercial Paper Credit Ratings

An R-1 (low) rating by DBRS is the third highest of ten categories and is granted to short-term debt of satisfactory credit quality. The overall strength and outlook for key liquidity, debt, and profitability ratios is not normally as favourable as with higher rating categories, but these considerations are still respectable. Any qualifying negative factors that exist are considered manageable, and the entity is normally of sufficient size to have some influence in its industry.

An A-1 (mid) rating by S&P is the second highest of eight categories in its Canadian commercial paper ratings scale and is granted where the obligor’s capacity to meet its financial commitment on the obligation is strong.

Preferred Share Credit Ratings

A Pfd-2 rating by DBRS is the second highest of six categories granted by DBRS for preferred shares and is granted to companies presenting satisfactory credit quality where protection of dividends and principal is still substantial, but earnings, the balance sheet and coverage ratios are not as strong as Pfd-1 rated companies. “High”, and “low” grades may be used to indicate the relative standing of a credit within a particular rating category.

A P-2 rating by S&P is the second highest of eight categories S&P uses in its Canadian preferred share rating scale and is granted where the obligor’s capacity to meet its financial commitments is considered adequate, but is more subject to adverse economic conditions than higher rating categories. “High”, “mid” and “low” grades may be used to indicate the relative standing of a credit within a particular rating category.

Credit Ratings Generally

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the rating organization.

DIRECTORS AND EXECUTIVE OFFICERS

Set out below is information with respect to the directors and officers of the Corporation.

Name, Province or State and Country of Residence	Position	Principal Occupation	Periods Served as a Director of the Corporation
R.T. Booth (4) Alberta, Canada	Director	Partner, Bennett Jones LLP (barristers and solicitors)	1998 to date

Notes:

- (1) Each director holds office until the close of the annual meeting of shareholders of the Corporation.
- (2) Member of the Corporate Governance – Nomination, Compensation and Succession Committee.
- (3) Member of the Audit Committee.
- (4) Member of the Risk Review Committee.
- (5) Member of the Pension Fund Committee.
- (6) R.D. Southern was a director of Canadian Airlines Corporation when it filed for protection under the Companies' Creditors Arrangement Act on March 24, 2000.

All of the directors and officers have been engaged for the last five years in the indicated principal occupations, or in other capacities with the companies or firms referred to, or with affiliates or predecessors thereof, with the exception of Mr. J.W. Simpson who was Vice President, Middle East & North Africa, Business Development, Chevron Texaco Corporation.

SHAREHOLDINGS OF DIRECTORS AND EXECUTIVE OFFICERS

At December 31, 2005, the directors and officers of the Corporation, as a group, beneficially owned, directly or indirectly (via corporate holdings or otherwise), or exercised control or direction over approximately 74.6% of the outstanding Class B common shares of the Corporation.

AUDIT COMMITTEE

Audit Committee Charter

Canadian Utilities Limited Audit Committee Mandate

Purpose

The purpose of this Mandate is to establish the terms of reference of the Audit Committee of the Corporation. The Audit Committee is appointed by the Board of Directors of the Corporation. The Audit Committee is responsible for contributing to the effective stewardship of the Corporation by assisting the Board of Directors in fulfilling its oversight of:

- the integrity of the Corporation's financial statements;
- the Corporation's compliance with applicable legal and regulatory requirements;
- the independence, qualifications and appointment of the Corporation's external auditor; and
- the performance of the Corporation's internal audit function and external auditors.

Composition

The Board of Directors shall elect annually from among its members an Audit Committee comprised of not less than 3 directors. Each member of the Audit Committee must be:

- a director of the Corporation;
- independent (within the meaning of sections 1.4 and 1.5 of Multilateral Instrument 52-110 *Audit Committees*); and
- financially literate.

In order to be considered to be an independent director for the purposes of membership on the Audit Committee, a director must have been determined by the Board of Directors to be independent in accordance with all applicable regulatory requirements.

The Board of Directors will appoint one member of the Audit Committee as Chairman. Any member of the Audit Committee may be removed or replaced at any time by the Board of Directors, and a member shall cease to be a member of the Audit Committee upon ceasing to be independent.

Meetings

The Audit Committee shall meet at least four times per year and whenever deemed necessary by the Chairman of the Audit Committee or at the request of an Audit Committee member or the Corporation's external or internal auditors. The Audit Committee Chairman shall prepare and/or approve an agenda in advance of each meeting. Reasonable notification of meetings, which may be held in person, by telephone or other communication device, shall be sent to the members of the Audit Committee, the external auditors and any additional attendees as determined by the Chairman. The external auditor has the right to appear before and be heard at any meeting of the Audit Committee. Upon the request of the external auditor, the Chairman of the Audit Committee shall convene a meeting of the Audit Committee to consider any matters which the auditor believes should be brought to the attention of the directors or shareholders of the Corporation. Meetings will be scheduled to permit timely review of Audit Committee materials. A majority of the Audit Committee will constitute a quorum. Minutes of each meeting will be prepared by the person designated by the Audit Committee to act as secretary and will be kept by the Corporate Secretarial Department.

Reporting

The Audit Committee shall report to the Board of Directors of the Corporation on such matters and questions relating to the financial position of the Corporation as the Board of Directors may from time to time refer to the Audit Committee. A summary of all meetings will be provided to the Board of Directors by the Audit Committee Chairman. Supporting schedules and information reviewed by the Audit Committee will be available for examination by any director upon request. The external auditors and the Vice President, Internal Audit and Risk Management shall report directly to the Audit Committee. The Audit Committee is expected to maintain free and open communication with the Corporation's external auditors, internal auditors and management. This communication shall include private sessions, at least annually, with each of these parties.

Responsibilities

The Audit Committee relies on the expertise and knowledge of management, and the internal and external auditors in carrying out its oversight responsibilities. Management of the Corporation is responsible for determining that the Corporation's financial statements are complete, accurate and in accordance with generally accepted accounting principles. The external auditors are responsible for auditing the Corporation's financial statements.

The Audit Committee shall have the power to conduct or authorize investigations into any matters within the Audit Committee's scope of responsibilities. The Audit Committee shall be empowered to retain independent counsel, accountants or other outside advisors as it determines necessary to permit it to carry out its duties.

The Audit Committee shall:

- Recommend to the Board of Directors:
 - (a) The external auditors to be nominated for the purpose of preparing or issuing an audit report or performing other audit, review or attestation services for the Corporation;
 - (b) The compensation of the external auditors; and
 - (c) The approval of the Corporation's annual financial statements, AIF and MD&A.
- Be directly responsible for overseeing the work of the external auditors engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attestation services for the Corporation, including the resolution of disagreements between management and the external auditors regarding financial reporting.
- Pre-approve all non-audit services to be provided to the Corporation or its subsidiaries by the external auditors of the Corporation or its subsidiaries. The Audit Committee may delegate to one or more of its members the authority to grant pre-approvals provided that any pre-approvals so granted are presented in writing to the Audit Committee at the next regularly scheduled meeting. The Audit Committee will ensure that relevant policies and procedures are in place to manage this process and comply with all applicable regulatory requirements.
- Review the Corporation's annual and interim financial statements, AIF, MD&A and annual and interim earnings press releases before this information is publicly disclosed.
- As delegated by the Board of Directors, approve the interim financial statements, MD&A and earnings press releases before this information is publicly disclosed.
- Be satisfied that adequate procedures are in place for the review of the Corporation's disclosure of financial information extracted or derived from the Corporation's financial statements, and periodically assess the adequacy of such procedures. This would include an annual review of the Corporation Disclosure Policy.

- Establish procedures for:
 - (a) the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls, auditing matters, fraud or theft; and
 - (b) the confidential, anonymous submission by employees of the Corporation of concerns regarding questionable accounting or auditing matters, fraud or theft.
- Ensure the Corporation has implemented appropriate systems of internal control over financial reporting and that these systems are operating effectively;
- Ensure the internal audit function has been effectively carried out and the internal auditors have adequate resources;
- Review and approve the Corporation’s hiring policies regarding partners, employees and former partners and employees of the present and former external auditors of the Corporation;
- Review and reassess annually the adequacy of the Audit Committee’s responsibilities and recommend any proposed changes to the Board of Directors for approval.

The members of the Audit Committee, for the purpose of performing their duties, have the right to inspect all the books and records of the Corporation and its subsidiary entities and to discuss such books and records in any manner relating to the financial position of the Corporation and its subsidiary entities with the officers, employees and external auditors of the Corporation and its subsidiary entities.

The Audit Committee will inquire into any other matters referred to it by the Board of Directors.

Composition of the Audit Committee

The following are members of the Corporation’s Audit Committee. All members are independent and financially literate:

- B.K. French
- H.M. Neldner
- J.W. Simpson
- C.W. Wilson

Relevant Education and Experience

B.K. French	Mr. French has a Bachelor of Commerce with an Accounting and Finance Major and is a Chartered Accountant. Mr. French was engaged in public practice for 25 years.
H.M. Neldner	Mr. Neldner has a Bachelor of Commerce (Finance). Mr. Neldner held various senior management positions in accounting and finance including General Accountant, Comptroller, Vice President Finance and President & CEO with Alberta Government Telephones and Telus Corporation.
J.W. Simpson	Mr. Simpson graduated from an Executive Program at M.I.T’s Sloan School of Business. During Mr. Simpson’s career at Chevron Corporation various financial positions reported to him. In his capacity as General Manager the accounting department reported to him and as President of Chevron Canada the Vice President Finance directly reported to Mr. Simpson. In addition, Mr. Simpson was Chairman of the Internal Audit Committee of Chevron Canada.
C.W. Wilson	Mr. Wilson has an understanding of the accounting principles of Canadian Utilities Limited. In addition, Mr. Wilson previously supervised a CFO directly for a seven year period as President & CEO of Shell Canada Ltd.

Reliance on Certain Exemptions

The Corporation did not rely on any exemptions from the Audit Committee requirements of Canadian Securities Legislation.

Audit Committee Oversight

Since January 1, 2005, all recommendations of the Audit Committee to nominate or compensate an external auditor were adopted by the Board of Directors.

Pre-Approval Policies and Procedures

The Audit Committee and the Board of Directors of the Corporation have adopted a policy for approval of external auditor services. The policy prohibits the external auditor from providing specified services to the Corporation and its subsidiaries.

The engagement of the external auditor for a range of services defined in the policy has been pre-approved by the Audit Committee. If an engagement of the external auditor is contemplated for a particular service that is neither prohibited nor covered under the range of pre-approved services, such engagement must be pre-approved. The Audit Committee has delegated the authority to grant such pre-approval to the Chairman of the Audit Committee.

Services provided by the external auditor are subject to an engagement letter. The policy mandates that the Audit Committee receive regular reports of all new pre-approved engagements of the external auditor.

External Auditor Service Fees

The aggregate fees incurred by the Corporation and its subsidiaries for professional services provided by PricewaterhouseCoopers LLP for each of the past two years were as follows:

	<u>2005</u>	<u>2004</u>
	(\$Millions)	
Audit (1)	1.3	1.3
Audit Related (2)	0.1	0.1
Tax (3)	<u>0.3</u>	<u>0.1</u>
Total.....	<u><u>1.7</u></u>	<u><u>1.5</u></u>

Notes:

- (1) *Audit fees include the aggregate professional fees paid to the external auditor for the audit of the annual consolidated financial statements and other regulatory audits and filings.*
- (2) *Audit-related fees include the aggregate fees paid to the external auditor for services related to special purpose audits and the audit services including consultations regarding financial reporting and accounting standards.*
- (3) *Tax fees include the aggregate fees paid to the external auditor for tax compliance, tax advice, tax planning and advisory services relating to the preparation of corporate tax, capital tax and sales tax returns.*

MARKETS FOR THE SECURITIES OF THE CORPORATION

The Corporation's Class A shares, Class B shares and Cumulative Redeemable Second Preferred Shares, Series Q, R, S, W and X are listed on the Toronto Stock Exchange. The Perpetual Cumulative Second Preferred Shares Series O, T, U and V are not listed.

The following table sets forth the high and low prices and the volume of shares traded on the Toronto Stock Exchange during 2005 for the Corporation's listed shares.
