ATCO AWARDED NATO CONTRACT TO SUPPORT TRAINING Frontec to Provide Services for 11-Nation Exercise in Africa

CALGARY, Alberta -- ATCO Frontec is providing Real Life Support Services to a major NATO training exercise in Africa where military personnel from 11 countries will exercise the strategic deployment of the NATO Response Force (NRF).

Exercise *Steadfast Jaguar*, to be conducted in the Republic of Cape Verde off the west coast of Africa from 15 to 30 June 2006, will involve more than 5,500 military personnel.

The contract, effective immediately, was awarded by the NATO Maintenance and Supply Agency, NATO's logistics agency of choice.

ATCO Frontec is providing camp support services, transportation, fresh food supplements, potable water supply, and waste treatment at several national and multi-national NATO camps being established on three separate islands – Sal, Sao Vicente and San Antao.

“Through proven performance and expert provision of service, ATCO Frontec continues to build a strong relationship with NATO in the area of supporting military operations overseas,” said Harry Wilmot, President, ATCO Frontec.

Since 2000, ATCO Frontec has gained extensive experience and expertise in the provision of support services to military personnel deployed worldwide. Most recently, ATCO Frontec concluded a three-month project with similar requirements for the NATO Disaster Relief Team in response to earthquakes in Pakistan in 2005.

ATCO Frontec currently provides advanced information systems technological support to the NATO Stabilization Force at several locations in Bosnia and also delivers camp support services, equipment maintenance, and engineering support to NATO troops at the Kabul Afghanistan International Airport.

ATCO Frontec provides site support services and facilities management to the defence, transportation, telecommunications and resource sectors. ATCO Group is a worldwide organization of companies with more than 7,000 people actively engaged in Utilities, Power Generation and Global Enterprises.
