2022 INVESTOR FACT SHEET

UTILITIES | ENERGY INFRASTRUCTURE

Canadian Utilities is an ATCO company with approximately 4,800 employees and assets of \$21 billion. As a diversified global energy infrastructure corporation, Canadian Utilities offers comprehensive solutions and operational excellence in Utilities (electricity and natural gas transmission and distribution, and international operations); Energy Infrastructure (energy storage, energy generation, industrial water solutions, and clean fuels); and Retail Energy (electricity and natural gas retail sales, and whole-home solutions).

CU QUICK FACTS

Common Shares (TSX): CU, CU.X	
Total Assets	\$21 Billion
Dividends	\$1.78 per share annualized
Market Capitalization	\$10 billion
Common Shares Outstanding (weighted average)	270 million

It is also important for present and prospective share owners to understand that the Canadian Utilities share registry has both Class A non-voting (CU) and Class B common (CU.X) shares. Above values as of June 30, 2022.

INVESTMENT HIGHLIGHTS

Leaders in Clean Energy Transition – CU continues to bring innovative energy solutions to the markets in which we operate with a focus on energy transition and decarbonization. This includes projects in hydrogen, renewable natural gas and renewable electricity generation.

Accomplished Management Team – Our leaders' continued focus on operational excellence and transparent governance creates intergenerational value for our share owners.

Dividend Growth – CU has a 50-year track record of increasing common share dividends.

Strong, Investment Grade, Credit Rating – 'BBB+' rating by Standard & Poor's, an 'A' rating by DBRS Limited, and a 'A-' by Fitch.

OPERATIONAL EXCELLENCE

Remote Energy Transition – CU is focused on helping remote communities reduce their reliance on diesel through a combination of renewable generation, battery storage, and integrated control systems. In 2021, through these initiatives, the communities of Ft. Chip & Old Crow reduced their diesel consumption by a combined 1.7 million liters.

ESG Leadership – CU will be a key contributor to ATCO achieving its net zero commitment by 2050, along with numerous other targets including the reduction of net operational GHG emissions to earnings intensity by 30% (Scope 1 & 2), and managing, owning, or developing over 1,000 MW of renewable energy.

Hydrogen – CU is positioning itself as a leader in the hydrogen space. We are simultaneously pursuing the production of clean hydrogen in both Canada and Australia. Additionally, our global utility businesses are piloting hydrogen blending of up to 20% within the existing natural gas system. This blending will help decarbonize customer energy in a cost-effective manner.

Corporate Values – CU focuses on our key pillars of agility, collaboration, caring, and integrity to protect our core assets and optimize new growth platforms.

MANAGEMENT'S DISCUSSION AND ANALYSIS

FOR THE SIX MONTHS ENDED JUNE 30, 2022

This Management's Discussion and Analysis (MD&A) is meant to help readers understand key operational and financial events that influenced the results of Canadian Utilities Limited (Canadian Utilities, our, we, us, or the Company) during the six months ended June 30, 2022.

This MD&A was prepared as of July 27, 2022, and should be read with the Company's unaudited interim consolidated financial statements for the six months ended June 30, 2022. Additional information, including the Company's previous MD&As, Annual Information Form (2021 AIF), and audited consolidated financial statements for the year ended December 31, 2021, is available on SEDAR at www.sedar.com. Information contained in the 2021 MD&A is not discussed in this MD&A if it remains substantially unchanged.

The Company is controlled by ATCO Ltd. and its controlling share owner, Sentgraf Enterprises Ltd. and its controlling share owner, the Southern family.

Terms used throughout this MD&A are defined in the Glossary at the end of this document.

(1) Additional information regarding these total of segments measures is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

(2) Additional information regarding this non-GAAP measure is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Capital Investment to Capital Expenditures" in this MD&A.

REVENUES

Revenues for the second quarter of 2022 were \$933 million, \$143 million higher than the same period in 2021. Higher revenues, largely in Electricity Distribution and Natural Gas Distribution, are a result of rate relief provided to customers in 2021 in light of the COVID-19 global pandemic and subsequently the AUC decision to maximize the collection of 2021 deferred revenues in 2022. Higher revenues were also due to higher flow-through revenues in Electricity Distribution and Natural Gas Distribution, and higher natural gas prices in the Energy Infrastructure segment.

ADJUSTED EARNINGS ⁽¹⁾

Our adjusted earnings in the second quarter of 2022 were \$136 million or \$0.51 per share, compared to \$115 million or \$0.43 per share for the same period in 2021.

Higher adjusted earnings in the second quarter of 2022 were mainly due to inflation indexing on rate base in Australia which positively impacted earnings in the International Natural Gas Distribution business, the impact of the 2018-2019 General Tariff Application (GTA) Compliance Filing decision received in the second quarter of 2021 in the Electric Transmission business, and the timing of operating costs in the Natural Gas Distribution business.

Additional detail on the financial performance of our business units is discussed in the Business Unit Performance section of this MD&A.

EARNINGS ATTRIBUTABLE TO EQUITY OWNERS OF THE COMPANY

Earnings attributable to equity owners of the Company were \$151 million in the second quarter of 2022, \$146 million higher compared to 2021. Earnings attributable to equity owners of the Company include timing adjustments related to rate-regulated activities, dividends on equity preferred shares of the Company, unrealized gains or losses on mark-to-market forward and swap commodity contracts, one-time gains and losses, impairments, and items that are not in the normal course of business or a result of day-to-day operations. These items are not included in adjusted earnings.

More information on these and other items is included in the Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company section of this MD&A.

Earnings attributable to equity owners of the Company are earnings attributable to Class A and Class B shares plus dividends on equity preferred shares of the Company. Additional information regarding earnings attributable to Class A and Class B shares is presented in Note 5 of the unaudited interim consolidated financial statements.

CASH FLOWS FROM OPERATING ACTIVITIES

Cash flows from operating activities were \$513 million in the second quarter of 2022, \$136 million higher than the same period in 2021. The increase was mainly due to higher cash flows from the Electricity Distribution and Gas Distribution businesses resulting from revenue attributable to the recovery of the 2021 deferral of rate increases, and the timing of certain revenue and expenses in the Utilities.

COMMON SHARE DIVIDENDS

Dividends paid to Class A and Class B share owners in the second quarter of 2022 totaled \$116 million, net of \$5 million of DRIP. On July 14, 2022, the Board of Directors declared a third quarter dividend of 44.42 cents per share or \$1.78 on an annualized basis. We aim to grow dividends in-line with our sustainable earnings growth, which is linked to growth from our regulated and long-term contracted investments.

Quarterly Dividend Rate 1972 - 2022
(dollars per share)

(1) Additional information is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

CAPITAL INVESTMENT ⁽¹⁾ AND CAPITAL EXPENDITURES

Total capital investment and capital expenditures of \$297 million and \$294 million in the second quarter of 2022 were \$133 million and \$127 million lower compared to the same periods in 2021 mainly due to the 2021 acquisition of the Pioneer Pipeline in Natural Gas Transmission. This is partially offset by increased construction activities within the Energy Infrastructure segment.

Total capital investment and capital expenditures of \$562 million and \$557 million in the first six months of 2022 were \$98 million and \$89 million lower compared to the same periods in 2021 mainly due to the 2021 acquisition of the Pioneer Pipeline, and the completion of construction of the Calgary Northwest Connector in 2021 in the Natural Gas Transmission business. This is partially offset by increased construction activities within the Energy Infrastructure segment.

Capital spending in the Regulated Utilities accounted for 83 per cent of total capital expenditures in the first six months of 2022. The remaining 17 per cent was mainly related to increased construction activities within the Energy Infrastructure segment, including the Empress, Barlow and Deerfoot Solar Projects.

Capital Expenditures for the Six Months Ended June 30, 2022

⁽¹⁾ Additional information regarding this non-GAAP measure is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Capital Investment to Capital Expenditures" in this MD&A.

BUSINESS UNIT PERFORMANCE

REVENUES

Utilities revenues of \$797 million and \$1,761 million in the second quarter and first six months of 2022 were \$109 million and \$283 million higher compared to the same periods in 2021. Higher revenues, largely in Electricity Distribution and Natural Gas Distribution, are a result of rate relief provided to customers in 2021 in light of the COVID-19 global pandemic and subsequently the AUC decision to maximize the collection of 2021 deferred revenues in 2022. Higher revenues are also due to higher flow-through revenues in Electricity Distribution and Natural Gas Distribution.

ADJUSTED EARNINGS

(1) Additional information regarding these non-GAAP measures is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

(2) Additional information regarding this total of segments measure is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings Attributable to Equity Owners of the Company" in this MD&A.

Utilities adjusted earnings of \$156 million and \$390 million in the second quarter and first six months of 2022 were \$32 million and \$65 million higher than the same periods in 2021. Higher earnings were mainly due to the impact of inflation indexing on rate base in the International Natural Gas Distribution business, timing of operating costs, cost efficiencies, and growth in rate base. Higher adjusted earnings were also due to the impact of the Electricity Transmission 2018-2019 GTA Compliance Filing decision received from the AUC in the second quarter of 2021.

Detailed information about the activities and financial results of the Utilities business segments is provided in the following sections.

Electricity Distribution

Electricity Distribution provides regulated electricity distribution and distributed generation mainly in Northern and Central East Alberta, the Yukon, the Northwest Territories and in the Lloydminster area of Saskatchewan.

Electricity Distribution adjusted earnings of \$40 million and \$87 million in the second quarter and first six months of 2022 were \$3 million and \$8 million higher than the same periods in 2021 mainly due to cost efficiencies.

Electricity Transmission

Electricity Transmission provides regulated electricity transmission mainly in Northern and Central East Alberta, and in the Lloydminster area of Saskatchewan. Electricity Transmission has a 35-year contract to be the operator of Alberta PowerLine, a 500-km electricity transmission line between Wabamun, near Edmonton and Fort McMurray, Alberta.

Electricity Transmission adjusted earnings of \$44 million and \$87 million in the second quarter and first six months of 2022 were \$8 million higher than the same periods in 2021. Earnings in 2021 were lower as a result of the Electricity Transmission 2018-2019 GTA Compliance Filing decision received from the AUC in the second quarter of 2021.

International Electricity Operations

International Electricity Operations includes a 50 per cent ownership in LUMA Energy, a company formed to transform, modernize and operate Puerto Rico's 30,000-km electricity transmission and distribution system under an Operations and Maintenance Agreement with the Puerto Rico Public-Private Partnerships Authority (P3A) and the Puerto Rico Electric Power Authority (PREPA).

LUMA Energy has assumed operations under terms of a Supplemental Agreement as PREPA remains in bankruptcy. This Agreement can span up to 18 months and allows LUMA Energy to collect an annualized fixed fee equivalent of \$115 million USD. Should PREPA emerge from bankruptcy during this period, LUMA Energy will transition to year one of the Operations and Maintenance agreement.

International Electricity Operations adjusted earnings of \$11 million and \$22 million in the second quarter and first six months of 2022 were \$2 million and \$8 million higher than the same periods in 2021. Higher adjusted earnings were mainly due to ongoing operations, as compared to the ongoing transition work in the first half of 2021.

Natural Gas Distribution

Natural Gas Distribution serves municipal, residential, commercial and industrial customers throughout Alberta and in the Lloydminster area of Saskatchewan.

Natural Gas Distribution adjusted earnings of \$12 million and \$111 million in the second quarter and first six months of 2022 were \$5 million and \$23 million higher than the same periods in 2021 mainly due to the timing of operating costs in 2022 and 2021 and cost efficiencies.

Natural Gas Transmission

Natural Gas Transmission receives natural gas on its pipeline system from various gas processing plants as well as from other natural gas transmission systems and transports it to end users within the province of Alberta or to other pipeline systems.

Natural Gas Transmission adjusted earnings of \$23 million and \$46 million in the second quarter and first six months of 2022 were \$2 million and \$6 million higher than the same periods in 2021. Higher adjusted earnings were mainly due to growth in rate base, including the acquisition of the Pioneer Pipeline which occurred in June 2021.

International Natural Gas Distribution

International Natural Gas Distribution is a regulated provider of natural gas distribution services in Western Australia, serving metropolitan Perth and surrounding regions.

International Natural Gas Distribution adjusted earnings of \$26 million and \$37 million in the second quarter and first six months of 2022 were \$12 million higher than the same periods in 2021 mainly due to the impact of inflation indexing on rate base. The impact of inflation on rate base is added to the rate base annually and is reflected in customer rates in future periods through the recovery of depreciation. Customer rates are adjusted annually through a mechanism, which adjusts the approved rates in real dollars for actual inflation.

UTILITIES REGULATORY DEVELOPMENTS

COMMON MATTERS

Generic Cost of Capital (GCOC)

On March 31, 2022, the AUC approved the extension of the current return on equity (ROE) of 8.5 per cent and equity thickness ratio of 37 per cent on a final basis for the 2023 period. On June 29, 2022, the AUC initiated a process schedule to determine the cost-of-capital parameters and explore a formula-based approach to determine the ROE for 2024 and future test years. As part of this proceeding, the AUC has also highlighted the need to establish the deemed equity ratios for the 2024 test period and in future years if a formula is implemented.

Third Generation Performance Based Regulation

On May 26, 2022, the AUC initiated a proceeding to establish parameters for a third generation of performance-based regulation (PBR 3). Following a one-year cost of service rebasing in 2023, this proceeding will set rates for the Distribution utilities for the subsequent PBR term which commences in 2024. The current schedule has evidence to be filed with the AUC in the first quarter of 2023 with an oral hearing in the second quarter of 2023.

Bill 18 – Utility Commodity Rebate Act

On April 25, 2022, the provincial government passed Bill 18: Utility Commodity Rebate Act which includes new legislation to allow the government to provide upcoming electricity and gas rebates to Albertans. Bill 18 enables the upcoming electricity rebates of \$50 per month for six consecutive months starting July 2022, for a total rebate of \$300 to almost all homes and businesses. Bill 18 will also enable the natural gas rebate (administrated through retailers) if regulated natural gas rates exceed \$6.50 per gigajoule next winter (October 1, 2022 to March 31, 2023). Since the rebate will be government funded there will be no financial impact to Canadian Utilities.

ELECTRICITY TRANSMISSION

Application of AUC Enforcement Staff for the Commencement of Proceeding Pursuant to Sections 8 and 63 of the *Alberta Utilities Commission Act*

On November 29, 2021, the AUC enforcement branch filed an application with the AUC recommending an enforcement proceeding be initiated. A proceeding was commenced to determine whether ATCO Electric Transmission failed to comply with AUC decisions and enactments under the AUC's jurisdiction with respect to a sole source contract for the Jasper interconnection project and the actions leading up to and including the filing of the 2018-2020 Deferral Account Application.

The AUC enforcement branch and ATCO Electric Transmission commenced settlement discussions in January 2022. On March 18, 2022, the AUC enforcement branch and ATCO Electric Transmission concluded discussions and notified the AUC that the parties had reached a settlement on all matters. On April 14, 2022, the AUC Enforcement branch and ATCO Electric Transmission filed the settlement with the AUC, which reflected an agreed administrative penalty of \$31 million, a commitment to amend the ongoing Deferral Account application to ensure the estimated \$11 million of additional rate base remains excluded from customer rates, and the implementation of revised practices and policies. On June 29, 2022, the AUC issued its decision approving the settlement in its entirety. In the fourth quarter of 2021 and first quarter of 2022, the Company recognized costs of \$14 million and \$27 million (after-tax), respectively, related to the proceeding.

ATCO Electric Transmission 2023-2025 GTA Application

On May 19, 2022, ATCO Electric Transmission filed a GTA for 2023, 2024 and 2025. The application requests approval of revenue requirements of \$675 million in 2023, \$685 million in 2024 and \$696 million in 2025, related to operational and maintenance costs as well as capital expenditures needed over the test periods. The application also requests new deferral accounts and changes to a number of existing deferral accounts.

INTERNATIONAL NATURAL GAS DISTRIBUTION

Access Arrangement 6 (AA6)

ATCO Gas Australia is advancing its AA6 submission to the Economic Regulation Authority (ERA) for the period January 1, 2025 to December 31, 2029. ATCO Gas Australia will formally submit its Access Arrangement proposal to the ERA by September 1, 2023.

Under the current Access Arrangement, ATCO Gas Australia is using the Post-Tax Revenue Model method to determine revenue requirements and customer rates. Under this method, the impact of inflation on rate base is added to the rate base annually. The inflation impact is reflected in customer rates in future periods through the recovery of depreciation. Customer rates are adjusted annually through a mechanism, which adjusts the approved rates in real dollars for actual inflation.

REVENUES

Energy Infrastructure revenues of \$70 million and \$151 million in the second quarter and first six months of 2022 were \$31 million and \$60 million higher than the same periods in 2021 mainly due to higher natural gas prices at the Carbon, Alberta natural gas storage facility and additional revenue from the Alberta Hub natural gas facility acquired in December 2021.

ADJUSTED EARNINGS

(\$ millions)	Three Months Ended June 30			Six Months Ended June 30		
	2022	2021	Change	2022	2021	Change
Electricity Generation ^{(1) (2)}	4	2	2	6	8	(2)
Storage & Industrial Water ^{(1) (2)}	6	5	1	12	9	3
Total Energy Infrastructure ⁽²⁾	10	7	3	18	17	1

(1) Considered to be non-GAAP financial measures.

(2) Additional information is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

Energy Infrastructure adjusted earnings of \$10 million and \$18 million in the second quarter and first six months of 2022 were \$3 million and \$1 million higher than the same periods in 2021 mainly due to earnings from the Alberta Hub natural gas storage facility acquired in December 2021 and an insurance recovery related to the Karratha facility in Australia.

Detailed information about the activities and financial results of Energy Infrastructure's businesses is provided in the following sections.

Electricity Generation

Non-regulated electricity activities include the supply of electricity from solar, hydroelectric, and natural gas generating plants in Western Canada, Australia, Mexico, and Chile and non-regulated electricity transmission in Alberta.

Electricity Generation adjusted earnings of \$4 million in the second quarter of 2022 were \$2 million higher compared to the same period in 2021. Higher adjusted earnings for the second quarter was mainly due to an insurance recovery related to the Karratha facility in Australia, and higher power pricing at the Old Man River hydro facility.

Electricity Generation adjusted earnings of \$6 million in the first six months of 2022 were \$2 million lower than the same period in 2021 mainly due to recovered business development costs in 2021, partially offset by an insurance recovery related to the Karratha facility in Australia, and higher power pricing at the Old Man River hydro facility.

Storage & Industrial Water

Storage & Industrial Water provides non-regulated natural gas storage and transmission activities, natural gas liquids storage, and industrial water services in Alberta and the Northwest Territories.

Storage & Industrial Water adjusted earnings of \$6 million and \$12 million in the second quarter and first six months of 2022 were \$1 million and \$3 million higher compared to the same periods in 2021 mainly due to earnings from the Alberta Hub natural gas storage facility acquired in December 2021.

ENERGY INFRASTRUCTURE RECENT DEVELOPMENTS

Canadian Utilities - Canadian Pacific Hydrogen Locomotive Project

In May 2022, Canadian Utilities announced an agreement with Canadian Pacific (CP) to provide engineering, procurement and construction services for two hydrogen production and refueling facilities in Calgary and Edmonton. The fuelling stations will be essential in bringing zero-emissions hydrogen locomotive propulsion into reality as part of CP's commitment to sustainable and responsible operations. The construction of these facilities will advance CP's innovative Hydrogen Locomotive Program, which has its sights set on building its first line-haul hydrogen-powered freight locomotive.

Construction of the facilities is expected to begin later in 2022 with production and supply of hydrogen being provided to locomotives in 2023.

Canadian Utilities' Corporate & Other segment includes Rūmi, Blue Flame Kitchen and Retail Energy through ATCOenergy which provides home products, home maintenance services, professional advice, and retail electricity and natural gas services in Alberta. Corporate & Other also includes the global corporate head office in Calgary, Canada, the Australia corporate head office in Perth, Australia and the Mexico corporate head office in Mexico City, Mexico. Canadian Utilities' Corporate & Other includes CU Inc. and Canadian Utilities preferred share dividend and debt expenses.

ADJUSTED EARNINGS

(\$ millions)	Three Months Ended June 30			Six Months Ended June 30		
	2022	2021	Change	2022	2021	Change
Canadian Utilities Corporate & Other ⁽¹⁾	(30)	(16)	(14)	(53)	(36)	(17)

(1) Additional information is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

Including intersegment eliminations, Canadian Utilities' Corporate & Other adjusted earnings in the second quarter and first six months of 2022 were \$14 million and \$17 million lower than the same periods in 2021 mainly due to increased financing costs from a new preferred share issuance in December 2021, and the timing of certain expenses, partially offset by improved earnings from ATCOenergy resulting from customer growth.

SUSTAINABILITY, CLIMATE CHANGE AND ENERGY TRANSITION

Within the ATCO group of companies (including Canadian Utilities), we balance the short- and long-term economic, environmental and social considerations of our businesses while creating value for our customers, employees, share owners, and Indigenous and community partners. As a provider of essential services in diverse communities around the world, we operate in an inclusive manner to meet the needs of society today and for generations to come while consistently delivering safe, reliable and affordable services.

The following section outlines commitments made by Canadian Utilities' parent company, ATCO. Canadian Utilities is supportive of the commitments made by ATCO and will play a key part in achieving the ESG targets set by ATCO.

Sustainability Reporting and ESG Targets

ATCO's 2021 Sustainability Report focuses on the following material topics:

- Energy Transition - energy transition and innovation, and energy access and affordability;
- Climate Change and Environmental Stewardship - climate change and GHG emissions, and environmental stewardship;
- Operational Reliability and Resilience - system reliability and availability, emergency preparedness and response, and supply chain resilience and responsibility;
- People - diversity, equity and inclusion, occupational health and safety, public health and safety; and
- Community and Indigenous Relations - Indigenous engagement, economic opportunity and reconciliation, and community engagement and investment.

In January 2022, ATCO released their net zero by 2050 commitment as well as an initial set of 2030 ESG Targets. ATCO's Board of Directors recognizes and fully supports the net-zero commitment and 2030 targets, and agrees that these commitments and targets align with our strategic direction. More detailed information and progress towards these targets are found in the 2021 Sustainability Report. Achieving net zero by 2050 is a societal challenge that no individual, business, or government can solve on its own. It will require unprecedented collaboration among all constituents, as well as an informed, pragmatic, and affordable roadmap from policymakers to unlock the necessary scale and pace of private sector investment and expertise.

The Sustainability Report is based upon the internationally recognized Global Reporting Initiative (GRI) Standards. Our reporting is also guided by the Sustainability Accounting Standards Board (SASB) and the Financial Stability Board's Task Force on Climate-related Financial Disclosures' (TCFD) recommendations.

The 2021 Sustainability Report, ESG Datasheet, Corporate Governance, materiality assessment, and additional details and other disclosures are available on our website at www.canadianutilities.com.

Climate Change and Energy Transition

To contribute to a net-zero future, we continue to pursue initiatives to integrate cleaner fuels, renewable energy and energy storage. This includes looking at ways to modernize our energy infrastructure to accommodate new and innovative sources of energy as well as ways to further use energy more efficiently. We are decarbonizing our operations and enabling our customers to transition to lower emitting sources of energy, while maintaining safety, reliability and affordability.

POLICY/REGULATORY UPDATE

We actively and constructively work with all levels of government to advocate for enabling policy and regulation, and to identify barriers that impede cost-effective, economy-wide decarbonization. We participate in a wide number of discussions, and the following are examples of where we focus our efforts.

Government of Canada 2030 Emissions Reduction Plan (ERP)

Following the release of the 2030 Emissions Reduction Plan, Natural Resources Canada is setting up round tables across Canada to seek input. Some key goals of the ERP include: the development of the Clean Electricity Standard (CES) to achieve a net-zero emissions electricity system by 2035; a 42 per cent reduction in GHG emissions from the Oil and Gas industry from 2019 levels; a 72 per cent reduction in methane emissions from 2012 levels; an Electric Vehicle (EV) mandate that 20 per cent of new light-duty vehicle sales will be zero-emission vehicles by 2026, 60 per cent by 2030, and 100 per cent by 2035; and a 32 per cent reduction in GHG emission from heavy industries from 2019 levels.

Government of Canada Federal Budget 2022 and Investment Tax Credit (ITC)

The Canadian Federal Budget 2022 established a refundable investment tax credit for Carbon Capture, Utilization and Storage (CCUS). For 2022-2030, the CCUS ITC is 60 per cent for investments in equipment for capturing carbon from air, 50 per cent for investments that capture and store carbon, and 37.5 per cent for investments in equipment for storage, transportation, and use.

Government of Canada Clean Fuel Regulations (CFR)

The CFR were published in the Canada Gazette Part II on July 6, 2022, with reduction requirements coming into force on July 1, 2023. The CFR will require gasoline and diesel suppliers to reduce carbon intensity by approximately 13 per cent by 2030 and will create opportunities to generate credits through clean fuels production and fuel switching.

Government of Alberta Technology Innovation and Emissions Reduction (TIER) Regulation

The Government of Alberta is conducting engagement with industry to enable improvements to the TIER regulation. In Alberta, the TIER regulation came into effect on January 1, 2020 after meeting the Government of Canada's stringency requirements for carbon emitting pricing systems. This review and engagement will ensure TIER continues to meet the federal government's stringency requirements for the emission sources they cover.

Government of Alberta Bill 22 Electricity Statutes (Modernizing Alberta's Electricity Grid) Amendment Act, 2022

Bill 22, which received royal assent on May 31, 2022, enables the integration of energy storage (batteries) into Alberta's interconnected electric system and will include the development of new transmission regulations.

OTHER EXPENSES AND INCOME

A financial summary of other consolidated expenses and income items for the second quarter and first six months of 2022 and 2021 is given below. These amounts are presented in accordance with IFRS accounting standards. They have not been adjusted for the timing of revenues and expenses associated with rate-regulated activities and other items that are not in the normal course of business.

(\$ millions)	Three Months Ended June 30			Six Months Ended June 30		
	2022	2021	Change	2022	2021	Change
Operating costs	500	480	20	1,068	961	107
Depreciation, amortization and impairment	156	208	(52)	313	362	(49)
Earnings from investment in joint ventures	15	5	10	33	18	15
Net finance costs	92	96	(4)	189	193	(4)
Income tax expense	47	5	42	124	50	74

OPERATING COSTS

Operating costs, which are total costs and expenses less depreciation, amortization and impairment, increased by \$20 million and \$107 million in the second quarter and first six months of 2022 compared to the same periods in 2021. Higher operating costs were mainly due to higher flow-through costs in the Alberta Utilities, increased fuel costs in Energy Infrastructure due to the acquisition of Alberta Storage Hub Ltd., costs related to the AUC enforcement proceeding in Electricity Transmission, and higher prices for natural gas purchases at Energy Infrastructures' natural gas storage facility in Carbon, Alberta.

DEPRECIATION, AMORTIZATION AND IMPAIRMENT

Depreciation, amortization and impairment decreased by \$52 million and \$49 million in the second quarter and first six months of 2022 compared to the same periods in 2021 mainly due to the impairment of assets in the Energy Infrastructure segment as part of the continued assessment of our investment portfolio in the second quarter of 2021, partially offset by the acquisition of the Pioneer Pipeline in the Natural Gas Transmission business in June 2021, and ongoing capital investment in the regulated businesses.

EARNINGS FROM INVESTMENT IN JOINT VENTURES

Earnings from investment in joint ventures is mainly comprised of Canadian Utilities' ownership positions in electricity generation plants, Northland Utilities Enterprises (NUE) electricity operations in the Northwest Territories, LUMA Energy electricity operations and maintenance in Puerto Rico, and the Strathcona Storage Limited Partnership, which operates hydrocarbon storage facilities at the ATCO Heartland Energy Centre near Fort Saskatchewan, Alberta.

Earnings from investment in joint ventures increased by \$10 million and \$15 million in the second quarter and first six months of 2022 compared to the same periods in 2021. Higher earnings were generated in the second quarter of 2022 as a result of LUMA Energy's ongoing operations as compared to continued transition work in the second quarter of 2021, and the inclusion of NUE earnings as an investment in joint venture after entering into the share purchase agreement on March 31, 2022.

NET FINANCE COSTS

Net finance costs decreased by \$4 million in the second quarter and first six months of 2022 mainly due to higher interest income from cash investments.

INCOME TAX EXPENSE

Income taxes were higher by \$42 million and \$74 million in the second quarter and first six months of 2022 compared to the same periods in 2021 mainly due to increased IFRS earnings and non-deductible items.

LIQUIDITY AND CAPITAL RESOURCES

Our financial position is supported by our Regulated Utilities and our portfolio of energy infrastructure businesses, which are structured to be highly regulated and long-term contracted. Our business strategies, funding of operations, and planned future growth are supported by maintaining strong investment grade credit ratings and access to capital markets at competitive rates. Primary sources of capital are cash flow from operations and capital markets.

We consider it prudent to maintain enough liquidity to fund approximately one full year of cash requirements to preserve strong financial flexibility. Liquidity is generated by cash flow from operations and is supported by appropriate levels of cash and available committed credit facilities.

CREDIT RATINGS

	DBRS	S&P	Fitch
Canadian Utilities Limited			
Issuer	A	BBB+	A-
Senior unsecured debt	A	BBB	A-
Commercial paper	R-1 (low)	A-1 (low)	F2

CU Inc.			
Issuer	A (high)	A-	A-
Senior unsecured debt	A (high)	A-	A
Commercial paper	R-1 (low)	A-1 (low)	F2
Preferred shares	PFD-2 (high)	P-2	BBB+
ATCO Gas Australia Pty Ltd⁽¹⁾			
Issuer and senior unsecured debt	N/A	BBB+	N/A

(1) ATCO Gas Australia Pty Ltd is a regulated provider of natural gas distribution services in Western Australia, serving metropolitan Perth and surrounding regions.

LINES OF CREDIT

At June 30, 2022, Canadian Utilities and its subsidiaries had the following lines of credit.

(\$ millions)	Total	Used	Available
Long-term committed	2,450	845	1,605
Uncommitted	553	180	373
Total	3,003	1,025	1,978

Of the \$3,003 million in total lines of credit, \$553 million was in the form of uncommitted credit facilities with no set maturity date. The other \$2,450 million in credit lines was committed, with maturities between 2023 and 2026, and may be extended at the option of the lenders.

Of the \$1,025 million in lines of credit used, \$610 million was related to ATCO Gas Australia Pty Ltd. Long-term committed credit lines are used to satisfy all of ATCO Gas Australia Pty Ltd's term debt financing needs. The majority of the remaining usage is for the issuance of letters of credit.

CONSOLIDATED CASH FLOW

At June 30, 2022, the Company's cash position was \$1,096 million, an increase of \$346 million compared to December 31, 2021 mainly due to Canadian Utilities Limited's 2022 second quarter debt issuance, cash flows from operating activities achieved during the first six months of 2022, and the closing of a transaction to transfer a 30-km segment of the Pioneer Natural Gas Pipeline to NGTL, partially offset by cash used to fund the capital investment program, dividends paid, and payments of debt and interest.

Cash Flows from Operating Activities

Cash flows from operating activities were \$513 million and \$1,152 million in the second quarter and first six months of 2022, \$136 million and \$264 million higher than the same periods in 2021. These increases were mainly due to higher cash flows from the recovery of the 2021 deferral of customer rate increases, the timing of certain revenue and expenses in the Utilities, and cash generated from operations.

Cash Used for Capital Investment ⁽¹⁾ and Capital Expenditures

Total capital investment and capital expenditures of \$297 million and \$294 million in the second quarter of 2022 were \$133 million and \$127 million lower compared to the same periods in 2021 mainly due to the 2021 acquisition of the Pioneer Pipeline in Natural Gas Transmission. This is partially offset by increased construction activities within the Energy Infrastructure segment.

Total capital investment and capital expenditures of \$562 million and \$557 million in the first six months of 2022 were \$98 million and \$89 million lower compared to the same periods in 2021 mainly due to the 2021 acquisition of the Pioneer Pipeline, and the completion of construction of the Calgary Northwest Connector in 2021 in the Natural Gas Transmission business. This is partially offset by increased construction activities within the Energy Infrastructure segment.

(1) Additional information regarding this non-GAAP measure is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Capital Investment to Capital Expenditures" in this MD&A.

Capital investment and capital expenditures for the second quarter and first six months of 2022 and 2021 are shown in the table below.

(\$ millions)	Three Months Ended June 30			Six Months Ended June 30		
	2022	2021	Change	2022	2021	Change
Utilities						
Electricity	110	86	24	231	174	57

(1) Includes additions to property, plant and equipment, intangibles and \$3 million and \$5 million (2021 - \$3 million and \$6 million) of capitalized interest during construction for the second quarter and first six months of 2022.

(2) Includes \$63 million and \$108 million for the second quarter and first six months of 2022 (2021 - \$51 million and \$107 million) of capital expenditures, mainly in the Utilities, that were funded with the assistance of customer contributions.

(3) Additional information regarding this non-GAAP measure is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Capital Investment to Capital Expenditures" in this MD&A.

Base Shelf Prospectus - CU Inc. Debentures

On September 16, 2020, CU Inc. filed a base shelf prospectus that permits it to issue up to an aggregate of \$1.2 billion of debentures over the 25-month life of the prospectus. As of July 26, 2022, aggregate issuances of debentures were \$610 million.

Debt Issuance

On June 3, 2022, Canadian Utilities Limited issued \$250 million of 4.851 per cent 30-year debentures. Proceeds from this issuance will be used to repay existing indebtedness, and for other general corporate purposes.

Debenture Repayment

On April 1, 2022, Canadian Utilities subsidiary, CU Inc. repaid \$125 million of 9.92 per cent debentures.

Preferred Shares

On May 24, 2022, Canadian Utilities reset the quarterly dividend rate on its Series Y Preferred Shares for the five-year period from and including June 1, 2022 to May 31, 2027. The fixed dividend will be paid as and when declared by the Board of Directors of Canadian Utilities based on an annual dividend rate of 5.20 per cent.

Dividends and Common Shares

We have increased our common share dividend each year since 1972, a 50-year track record. Dividends paid to Class A and Class B share owners totaled \$116 million net of DRIP in the second quarter of 2022 and \$232 million in the first six months of 2022.

On July 14, 2022, the Board of Directors declared a third quarter dividend of 44.42 cents per share. The payment of any dividend is at the discretion of the Board of Directors and depends on our financial condition and other factors.

Normal Course Issuer Bid

We believe that, from time to time, the market price of our Class A shares may not fully reflect the value of our business, and that purchasing Class A shares represents a desirable use of available funds. The purchase of Class A shares, at appropriate prices, will also minimize any dilution resulting from the exercise of stock options.

On July 29, 2021, we commenced a normal course issuer bid to purchase up to 3,930,623 outstanding Class A shares. The bid will expire on July 28, 2022. To date, no shares have been purchased.

Dividend Reinvestment Plan (DRIP)

On January 13, 2022, the Company reinstated its dividend reinvestment program (DRIP) for eligible Class A non-voting and Class B common share owners who are enrolled in the program. The DRIP was previously suspended effective January 10, 2019.

In the second quarter of 2022, Canadian Utilities issued 111,958 Class A shares under the DRIP using re-invested dividends of \$5 million.

In the first six months of 2022, Canadian Utilities issued 210,872 Class A shares under the DRIP using re-invested dividends of \$8 million.

SHARE CAPITAL

Canadian Utilities' equity securities consist of Class A shares and Class B shares.

At July 26, 2022, we had outstanding 197,678,407 Class A shares, 71,902,229 Class B shares, and options to purchase 1,484,100 Class A shares.

CLASS A NON-VOTING SHARES AND CLASS B COMMON SHARES

Class A and Class B share owners are entitled to share equally, on a share for share basis, in all dividends the Company declares on either of such classes of shares as well as in the Company's remaining property on dissolution. Class B share owners are entitled to vote and to exchange at any time each share held for one Class A share.

If a take-over bid is made for the Class B shares and if it would result in the offeror owning more than 50 per cent of the outstanding Class B shares (excluding any Class B shares acquired upon conversion of Class A shares), the Class A share owners are entitled, for the duration of the take-over bid, to exchange their Class A shares for Class B shares and to tender the newly exchanged Class B shares to the take-over bid. Such right of exchange and tender is conditional on completion of the applicable take-over bid.

In addition, Class A share owners are entitled to exchange their shares for Class B shares if ATCO Ltd., the Company's controlling share owner, ceases to own or control, directly or indirectly, more than 10,000,000 of the issued and outstanding Class B shares. In either case, each Class A share is exchangeable for one Class B share, subject to changes in the exchange ratio for certain events such as a stock split or rights offering.

Of the 12,800,000 Class A shares authorized for grant of options under our stock option plan, 11,296,700 Class A shares were available for issuance at June 30, 2022. Options may be granted to officers and key employees of the Company and its subsidiaries at an exercise price equal to the weighted average of the trading price of the shares on the Toronto Stock Exchange for the five trading days immediately preceding the grant date. The vesting provisions and exercise period (which cannot exceed 10 years) are determined at the time of grant.

QUARTERLY INFORMATION

The following table shows financial information for the eight quarters ended September 30, 2020 through June 30, 2022.

<i>(\$ millions, except for per share data)</i>	Q3 2021	Q4 2021	Q1 2022	Q2 2022

Total adjusted earnings ⁽¹⁾	76	186	191	115

(1) Additional information regarding these total of segments measures is provided under the headings "Other Financial and Non-GAAP Measures" and "Reconciliation of Adjusted Earnings to Earnings Attributable to Equity Owners of the Company" in this MD&A.

Our financial results for the previous eight quarters reflect the timing of utility regulatory decisions, and the seasonal nature of demand for natural gas and electricity.

ADJUSTED EARNINGS

Adjusted earnings in the second and third quarters of each year were impacted by lower seasonal demand in the Natural Gas Distribution business. Adjusted earnings in the fourth quarter of 2021 were higher compared to the same period in 2020 mainly due to higher earnings from International Electricity Operations, and inflation indexing on rate base in Australia which positively impacted earnings in the International Natural Gas Distribution business. Higher earnings were partially offset by timing of operating costs in the Utilities, and costs associated with the purchase of the Alberta Hub natural gas storage facility, project development costs, non-recurring recoveries in 2020, and lower demand for natural gas storage in the Energy Infrastructure segment.

Adjusted earnings in the first quarter of 2022 were higher compared to the same period in 2021 mainly due to the timing of operating costs in the Natural Gas Distribution business, and earnings from International Electricity Operations.

Adjusted earnings in the second quarter of 2022 were higher compared to the same period in 2021 mainly due to inflation indexing on rate base in Australia which positively impacted earnings in the International Natural Gas Distribution business, the impact of the Electricity Transmission 2018-2019 GTA Compliance Filing decision received in the second quarter of 2021 in the Electric Transmission business, and the timing of operating costs in the Natural Gas Distribution business.

EARNINGS ATTRIBUTABLE TO EQUITY OWNERS OF THE COMPANY

Earnings attributable to equity owners of the Company includes timing adjustments related to rate-regulated activities and unrealized gains or losses on mark-to-market forward and swap commodity contracts. They also include one-time gains and losses, impairments, and other items that are not in the normal course of business or a result of day-to-day operations recorded at various times over the past eight quarters. These items are excluded from adjusted earnings and are highlighted below:

- Early Termination of the Master Service Agreements (MSA) for Managed IT Services
 - In the fourth quarter of 2020 and first quarter of 2021, the Company signed MSAs with IBM Canada Ltd. (subsequently novated to Kyndryl Canada Ltd.) and IBM Australia Limited (IBM), respectively, to provide managed IT services. These services were previously provided by Wipro Ltd. (Wipro) under a ten-year MSA expiring in December 2024. The Company recognized termination costs of \$55 million and \$4 million (after-tax) in the fourth quarter of 2020 and first quarter of 2021, respectively, which represents management's best estimate of the costs to exit the Wipro MSAs.
 - The transition of the managed IT services from Wipro to IBM commenced on February 1, 2021 and was completed by December 31, 2021. In 2021, the Company recognized transition costs of \$42 million (after-tax).
- In the second quarter of 2021, impairments and other costs not in the normal course of business of \$65 million (after-tax) were recorded. The Company incurred \$54 million of these costs in Mexico, related mainly to its Veracruz hydro facility within its Energy Infrastructure segment. The charge reflected an adverse arbitration decision, changes in market regulations, ongoing political uncertainty, and a challenging operating environment, resulting in an impairment of the carrying value of the assets. Other costs recorded were individually immaterial.
- During the fourth quarter of 2021, the Company recorded earnings of \$17 million (after-tax) following the conclusion of the Company's involvement in an international project.
- AUC Enforcement Proceeding
 - On April 14, 2022, the AUC Enforcement branch and ATCO Electric Transmission filed a settlement with the AUC regarding a sole source contract for the Jasper interconnection project. On June 29, 2022, the AUC issued its decision approving the settlement in its entirety. In the fourth quarter of 2021 and first quarter of 2022, the Company recognized costs of \$14 million and \$27 million (after-tax), respectively, related to the proceeding.
- Workplace COVID-19 Vaccination Standard
 - To safeguard the health and safety of employees, business partners, customers and communities, the Company required its employees, subject to certain exemptions, to be vaccinated against COVID-19 effective January 1, 2022. Employees who did not demonstrate they were vaccinated or did not have an approved exemption were provided severance. In the six months ended June 30, 2022, the Company incurred \$8 million (after-tax) in severance and related costs associated with the Workplace COVID-19 vaccination standard.
- Gain on sale of ownership interest in a subsidiary company
 - On March 31, 2022, the Company and Denendeh Investments Incorporated (DII) entered into a share purchase agreement to increase DII's ownership interest in Northland Utilities Enterprises Ltd. (NUE) from 14 per cent to 50 per cent. The transaction resulted in a gain on sale of \$5 million (after-tax). Effective March 31, 2022, the Company no longer consolidates NUE as a controlled subsidiary, and instead, accounts for its interest in NUE as an investment in joint venture using the equity method.

OTHER FINANCIAL AND NON-GAAP MEASURES

Other financial measures presented in this MD&A consist of:

1. Adjusted earnings which are a key measure of segment earnings that are used to assess segment performance and allocate resources; and
2. Total of segments measures, which are defined as financial measures disclosed by an issuer that are a subtotal or total of two or more reportable segments.

Adjusted earnings are defined as earnings attributable to equity owners of the Company after adjusting for the timing of revenues and expenses associated with rate-regulated activities, dividends on equity preferred shares of the Company, and unrealized gains or losses on mark-to-market forward and swap commodity contracts. Adjusted earnings also exclude one-time gains and losses, impairments, and items that are not in the normal course of business or a result of day-to-day operations.

Adjusted earnings present earnings from rate-regulated activities on the same basis as was used prior to adopting IFRS - that basis being the US accounting principles for rate-regulated activities. Adjusted earnings are presented in Note 3 of the unaudited interim consolidated financial statements. Adjusted earnings per Class A and Class B share is calculated by dividing adjusted earnings by the weighted average number of shares outstanding for the period.

Adjusted earnings are most directly comparable to earnings attributable to equity owners of the Company but is not a standardized financial measure under the reporting framework used to prepare our financial statements. Adjusted earnings may not be comparable to similar financial measures disclosed by other issuers. Management's view is that adjusted earnings allow for a more effective analysis of operating performance and trends. For investors, adjusted earnings may provide value as they exclude items that are not in the normal course of business and, as such, provide insight as to earnings resulting from the issuer's usual course of business. A reconciliation of adjusted earnings to earnings attributable to equity owners of the Company is presented in this MD&A.

Total of segments measures are most directly comparable to total earnings attributable to equity owners of the Company. Comparable total of segments measures for the same period in 2021 have been calculated using the same composition and are disclosed alongside the current total of segments measures in this MD&A. A reconciliation of the total of segments measures with total earnings attributable to equity owners of the Company is presented in this MD&A.

Non-GAAP financial measures presented in this MD&A are defined as financial measures disclosed by an issuer that are not disclosed in the financial statements.

Capital investment is a non-GAAP financial measure defined as cash used for capital expenditures, business combinations, and cash used in the Company's proportional share of capital expenditures in joint ventures. Capital expenditures includes additions to property, plant and equipment and intangibles as well as interest capitalized during construction. Capital investment is most directly comparable to capital expenditures. Capital investment is not a standardized financial measure under the reporting framework used to prepare our financial statements. Capital investment may not be comparable to similar financial measures disclosed by other issuers. Management views capital investment as the Company's total cash investment in assets. For investors, capital investment is useful because it identifies how much cash is being used to acquire, invest in and finance assets. A reconciliation of capital investments to capital expenditures is presented in this MD&A.

RECONCILIATION OF ADJUSTED EARNINGS TO EARNINGS ATTRIBUTABLE TO EQUITY OWNERS OF THE COMPANY

Adjusted earnings are earnings attributable to equity owners of the Company after adjusting for the timing of revenues and expenses associated with rate-regulated activities, dividends on equity preferred shares of the Company, and unrealized gains or losses on mark-to-market forward and swap commodity contracts. Adjusted earnings also exclude one-time gains and losses, impairments, and items that are not in the normal course of business or a result of day-to-day operations.

Adjusted earnings are a key measure of segment earnings that management uses to assess segment performance and allocate resources. It is management's view that adjusted earnings allow a better assessment of the economics of rate regulation in Canada and Australia than IFRS earnings. Additional information regarding this measure is provided in the Other Financial and Non-GAAP Measures section of this MD&A.

IMPAIRMENTS AND OTHER COSTS

In 2021, impairments and other costs not in the normal course of business of \$65 million (after-tax) were recorded. The Company incurred \$54 million of these costs in Mexico, related mainly to its Veracruz hydro facility within its Energy Infrastructure segment. The charge reflected an adverse arbitration decision, changes in market regulations, ongoing political uncertainty, and a challenging operating environment, resulting in an impairment of the carrying value of the assets. Other costs recorded were individually immaterial.

UNREALIZED GAINS AND LOSSES ON MARK-TO-MARKET FORWARD AND SWAP COMMODITY CONTRACTS

The Company's retail electricity and natural gas business in Alberta enters into fixed-price swap commodity contracts to manage exposure to electricity and natural gas prices and volumes. These contracts are measured at fair value. Unrealized gains and losses due to changes in the fair value of the fixed-price swap commodity contracts are recognized in the earnings of the Corporate & Other segment.

The CODM believes that removal of the unrealized gains or losses on mark-to-market forward and swap commodity contracts provides a better representation of operating results for the Company's operations.

Realized gains or losses are recognized in adjusted earnings when the commodity contracts are settled.

RATE-REGULATED ACTIVITIES

Electricity Distribution and Transmission and their subsidiary, ATCO Electric Yukon, and their investment in joint venture, Northland Utilities, as well as, Natural Gas Distribution, Natural Gas Transmission, and International Natural Gas Distribution are collectively referred to as the Regulated Utilities.

There is currently no specific guidance under IFRS for rate-regulated entities that the Company is eligible to adopt. In the absence of this guidance, the Regulated Utilities do not recognize assets and liabilities from rate-regulated activities as may be directed by regulatory decisions. Instead, the Regulated Utilities recognize revenues in earnings when amounts are billed to customers, consistent with the regulator-approved rate design. Operating costs and expenses are recorded when incurred. Costs incurred in constructing an asset that meet the asset recognition criteria are included in the related property, plant and equipment or intangible asset.

The Company uses standards issued by the Financial Accounting Standards Board (FASB) in the United States as another source of generally accepted accounting principles to account for rate-regulated activities in its internal reporting provided to the CODM. The CODM believes that earnings presented in accordance with the FASB standards are a better representation of the operating results of the Company's rate-regulated activities. Therefore, the Company presents adjusted earnings as part of its segmented disclosures on this basis. Rate-regulated accounting (RRA) standards impact the timing of how certain revenues and expenses are recognized when compared to non-rate regulated activities, to appropriately reflect the economic impact of a regulator's decisions on revenues.

Rate-regulated accounting differs from IFRS in the following ways:

Timing Adjustment	Items	RRA Treatment	IFRS Treatment
Additional revenues billed in current period	Future removal and site restoration costs, and impact of colder temperatures.	The Company defers the recognition of cash received in advance of future expenditures.	The Company recognizes revenues when amounts are billed to customers and costs when they are incurred.
Revenues to be billed in future periods	Deferred income taxes, impact of warmer temperatures, and impact of inflation on rate base.	The Company recognizes revenues associated with recoverable costs in advance of future billings to customers.	The Company recognizes costs when they are incurred, but does not recognize their recovery until customer rates are changed and amounts are collected through future billings.
Regulatory decisions received	Regulatory decisions received which relate to current and prior periods.	The Company recognizes the earnings from a regulatory decision pertaining to current and prior periods when the decision is received.	The Company does not recognize earnings from a regulatory decision when it is received as regulatory assets and liabilities are not recorded under IFRS.
Settlement of regulatory decisions and other items	Settlement of amounts receivable or payable to customers and other items.	The Company recognizes the amount receivable or payable to customers as a reduction in its regulatory assets and liabilities when collected or refunded through future billings.	The Company recognizes earnings when customer rates are changed and amounts are recovered or refunded to customers through future billings.

For the three months and six months ended June 30, 2022, the significant timing adjustments as a result of the differences between rate-regulated accounting and IFRS are as follows:

(\$ millions)	Three Months Ended June 30			Six Months Ended June 30		
	2022	2021	Change	2022	2021	Change
Additional revenues billed in current period						
Future removal and site restoration costs ⁽¹⁾	31	29	2	62	58	4
Impact of colder temperatures ⁽²⁾	4	1	3	—	—	—
Revenues to be billed in future periods						
Deferred income taxes ⁽³⁾	(25)	(30)	5	(47)	(55)	8
Distribution rate relief ⁽⁴⁾	—	(34)	34	—	(75)	75
Impact of warmer temperatures ⁽²⁾	—	—	—	(2)	(1)	(1)
Impact of inflation on rate base ⁽⁵⁾	(15)	(3)	(12)	(21)	(10)	(11)
Settlement of regulatory decisions and other items						
Distribution rate relief ⁽⁴⁾	30	—	30	65	—	65
Other	(5)	8	(13)	(1)	2	(3)
	20	(29)	49	56	(81)	137

(1) Removal and site restoration costs are billed to customers over the estimated useful life of the related assets based on forecast costs to be incurred in future periods.

(2) Natural Gas Distribution's customer rates are based on a forecast of normal temperatures. Fluctuations in temperatures may result in more or less revenue being recovered from customers than forecast. Revenues above or below normal temperatures in the current period are refunded to or recovered from customers in future periods.

(3) Income taxes are billed to customers when paid by the Company.

(4) During the three and six months ended June 30, 2021, in response to the ongoing COVID-19 Pandemic, Electricity Distribution and Natural Gas Distribution applied for interim rate relief for customers to hold current distribution base rates in place. Following approval by the AUC, Electricity Distribution and Natural Gas Distribution recorded a decrease in earnings for the three and six months ended June 30, 2021 of \$34 million and \$75 million (after-tax). Based on direction from the AUC, collection of 2021 deferred rates will be maximized in 2022. For the three and six months ended June 30, 2022, \$30 million and \$65 million (after-tax) was billed to customers.

(5) The inflation-indexed portion of International Natural Gas Distribution's rate base is billed to customers through the recovery of depreciation in subsequent years based on the actual or forecasted annual rate of inflation. Under rate-regulated accounting, revenue is recognized in the current year for the inflation component of rate base when it is earned. Differences between the amounts earned and the amounts billed to customers are deferred and recognized in revenues over the service life of the related assets.

IT COMMON MATTERS DECISION

Consistent with the treatment of the gain on sale in 2014 from the IT services business by the Company, financial impacts associated with the IT Common Matters decision are excluded from adjusted earnings. The amount excluded from adjusted earnings for the three and six months ended June 30, 2022 was \$3 million and \$7 million (after-tax) (2021 - \$3 million and \$7 million).

TRANSITION OF MANAGED IT SERVICES

In the fourth quarter of 2020 and first quarter of 2021, the Company signed MSAs with IBM Canada Ltd. (subsequently novated to Kyndryl Canada Ltd.) and IBM Australia Limited, respectively, to provide managed IT services. These services were previously provided by Wipro under a ten-year MSA expiring in December 2024. The transition of the managed IT services from Wipro to IBM commenced on February 1, 2021 and was completed by December 31, 2021. The amount excluded from adjusted earnings for the three month and six months ended June 30, 2022 was \$nil (2021 - \$16 million and \$27 million after-tax).

AUC ENFORCEMENT PROCEEDING

On April 14, 2022, the AUC Enforcement branch and ATCO Electric Transmission filed a settlement with the AUC regarding a sole source contract for the Jasper interconnection project. On June 29, 2022, the AUC issued its decision approving the settlement in its entirety. In the fourth quarter of 2021 and first quarter of 2022, the Company recognized costs of \$14 million and \$27 million (after-tax), respectively, related to the proceeding.

WORKPLACE COVID-19 VACCINATION STANDARD

To safeguard the health and safety of employees, business partners, customers and communities, the Company required its employees, subject to certain exemptions, to be vaccinated against COVID-19 effective January 1, 2022. Employees who did not demonstrate they were vaccinated or did not have an approved exemption were provided severance. In the six months ended June 30, 2022, the Company incurred \$8 million (after-tax) in severance and related costs associated with the Workplace COVID-19 vaccination standard.

GAIN ON SALE OF OWNERSHIP INTEREST IN A SUBSIDIARY COMPANY

On March 31, 2022, the Company and Denendeh Investments Incorporated (DII) entered into a share purchase agreement to increase DII's ownership interest in NUE from 14 per cent to 50 per cent. The transaction resulted in a gain on sale of \$5 million (after-tax). Effective March 31, 2022, the Company no longer consolidates NUE as a controlled subsidiary, and instead, accounts for its interest in NUE as an investment in joint venture using the equity method.

UTILITIES

RECONCILIATION OF CAPITAL INVESTMENT TO CAPITAL EXPENDITURES

Capital investment is a non-GAAP financial measure defined as cash used for capital expenditures, business combinations, and cash used in the Company's proportional share of capital expenditures in joint ventures. In management's opinion, capital investment reflects the Company's total cash investment in assets. Capital expenditures includes additions to property, plant and equipment and intangibles as well as interest capitalized during construction. Additional information regarding this non-GAAP measure is provided in the Other Financial and Non-GAAP Measures section of this MD&A.

OTHER FINANCIAL INFORMATION

INTERNAL CONTROL OVER FINANCIAL REPORTING

There was no change in the Company's internal control over financial reporting that occurred during the period beginning on April 1, 2022, and ended on June 30, 2022, that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

FORWARD-LOOKING INFORMATION

Certain statements contained in this MD&A constitute forward-looking information. Forward-looking information is often, but not always, identified by the use of words such as "anticipate", "plan", "estimate", "expect", "may", "will", "intend", "should", "goals", "targets", "strategy", "future", and similar expressions. In particular, forward-looking information in this MD&A includes, but is not limited to, references to: strategic plans and targets; reducing GHG emissions and meeting certain environmental, social and governance targets; and the engineering, procurement and construction of hydrogen production and refueling facilities to advance CP's hydrogen locomotive program.

Although the Company believes that the expectations reflected in the forward-looking information are reasonable based on the information available on the date such statements are made and processes used to prepare the information, such statements are not guarantees of future performance and no assurance can be given that these expectations will prove to be correct. Forward-looking information should not be unduly relied upon. By their nature, these statements involve a variety of assumptions, known and unknown risks and uncertainties, and other factors, which may cause actual results, levels of activity, and achievements to differ materially from those anticipated in such forward-looking information. The forward-looking information reflects the Company's beliefs and assumptions with respect to, among other things, the Company's ability to successfully achieve its net-zero GHG target by 2050; the development and performance of technology and technological innovations and the ability to otherwise access and implement all technology necessary to achieve GHG and other environmental, social and governance targets; continuing collaboration with certain regulatory and environmental groups; the performance of assets and equipment; demand levels for oil, natural gas, gasoline, diesel and other energy sources; certain levels of future energy use; future production rates; future revenue and earnings; the ability to meet current project schedules, and other assumptions inherent in management's expectations in respect of the forward-looking information identified herein.

The Company's actual results could differ materially from those anticipated in this forward-looking information as a result of, among other things, risks inherent in the performance of assets; capital efficiencies and cost savings; applicable laws and government policies; regulatory decisions; competitive factors in the industries in which the Company operates; prevailing economic conditions (including as may be affected by the COVID-19 pandemic); credit risk; interest rate fluctuations; the availability and cost of labour, materials, services, and infrastructure; the development and execution of projects; prices of electricity, natural gas, natural gas liquids, and renewable energy; the development and performance of technology and new energy efficient products, services, and programs including but not limited to the use of zero-emission and renewable fuels, carbon capture, and storage, electrification of equipment powered by zero-emission energy sources and utilization and availability of carbon offsets; the occurrence of unexpected events such as fires, severe weather conditions, explosions, blow-outs, equipment failures, transportation incidents, and other accidents or similar events; and other risk factors, many of which are beyond the control of the Company. Due to the interdependencies and correlation of these factors, the impact of any one material assumption or risk on a forward-looking statement cannot be determined with certainty. Readers are cautioned that the foregoing lists are not exhaustive. For additional information about the principal risks that the Company faces, see "Business Risks and Risk Management" in the Company's Management's Discussion and Analysis for the year ended December 31, 2021.

Any forward-looking information contained in this MD&A represents the Company's expectations as of the date hereof, and is subject to change after such date. The Company disclaims any intention or obligation to update or revise any forward-looking information whether as a result of new information, future events or otherwise, except as required by applicable securities legislation.

ADDITIONAL INFORMATION

Canadian Utilities has published its unaudited interim consolidated financial statements and MD&A for the six months ended June 30, 2022. Copies of these documents may be obtained upon request from Investor Relations at 3rd Floor, West Building, 5302 Forand Street S.W., Calgary, Alberta, T3E 8B4, telephone 403-292-7500, or email investorrelations@atco.com.

GLOSSARY

Alberta Utilities means Electricity Distribution, Electricity Transmission, Natural Gas Distribution and Natural Gas Transmission.

AUC means the Alberta Utilities Commission.

Class A shares means Class A non-voting shares of the Company.

Class B shares means Class B common shares of the Company.

CODM means Chief Operating Decision Maker, and is comprised of the Chair & Chief Executive Officer, and the other members of the Executive Committee.

Company means Canadian Utilities Limited and, unless the context otherwise requires, includes its subsidiaries and joint arrangements.

Customer Contributions are non-refundable cash contributions made by customers for certain additions to property, plant and equipment, mainly in the Utilities. These contributions are made when the estimated revenue is less than the cost of providing service.

GAAP means Canadian generally accepted accounting principles.

GHG means greenhouse gas.

IFRS means International Financial Reporting Standards.

Regulated Utilities means Electricity Distribution, Electricity Transmission, Natural Gas Distribution, Natural Gas Transmission and International Natural Gas Distribution.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

JUNE 30, 2022

(Tabular amounts in millions of Canadian Dollars, except as otherwise noted)

1. THE COMPANY AND ITS OPERATIONS

Canadian Utilities Limited was incorporated under the laws of Canada and is listed on the Toronto Stock Exchange. Its head office is at 4th Floor, West Building, 5302 Forand Street SW, Calgary, Alberta T3E 8B4 and its registered office is 20th Floor, 10035 - 105 Street, Edmonton, Alberta T5J 2V6. The Company is controlled by ATCO Ltd. and its controlling share owner, the Southern family.

Canadian Utilities Limited is engaged in the following business activities:

- Utilities (electricity and natural gas transmission and distribution and international electricity operations);
- Energy infrastructure (electricity generation, energy storage, and industrial water solutions); and
- Retail Energy (electricity and natural gas retail sales and whole-home solutions) (included in the Corporate & Other segment).

The unaudited interim consolidated financial statements include the accounts of Canadian Utilities Limited and its subsidiaries (the Company). The statements also include the accounts of a proportionate share of the Company's investments in joint operations and its equity-accounted investments in joint ventures.

2. BASIS OF PRESENTATION

STATEMENT OF COMPLIANCE

The unaudited interim consolidated financial statements are prepared according to International Accounting Standard (IAS) 34 Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and IFRS Interpretations Committee (IFRIC). They do not include all the disclosures required in annual consolidated financial statements and should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2021, prepared according to IFRS.

The unaudited interim consolidated financial statements are prepared following the same accounting policies used in the Company's most recent annual consolidated financial statements, except for income taxes. In interim periods, income taxes are accrued using an estimate of the annualized effective tax rate applied to year-to-date earnings.

The unaudited interim consolidated financial statements were authorized for issue by the Audit & Risk Committee, on behalf of the Board of Directors, on July 27, 2022.

BASIS OF MEASUREMENT

The unaudited interim consolidated financial statements are prepared on a historic cost basis, except for derivative financial instruments, retirement benefit obligations and cash-settled share-based compensation liabilities which are carried at remeasured amounts or fair value.

Revenues, earnings and adjusted earnings for any quarter are not necessarily indicative of operations on an annual basis. Quarterly financial results may be affected by the seasonal nature of the Company's operations, the timing of utility rate decisions, the timing and demand of natural gas storage capacity sold and changes in natural gas storage fees.

3. SEGMENTED INFORMATION

SEGMENTED RESULTS

Results by operating segment for the three months ended June 30 are shown below.

2022		Utilities			Energy Infrastructure	Corporate & Other	Intersegment eliminations	Consolidated

Capital expenditures ⁽³⁾	231	229	-	460	92	5	-	557
	174	458	-	632	9	5	-	646

(1) Includes total costs and expenses, excluding depreciation, amortization and impairment expense.

(2) 2021 comparatives are at December 31, 2021.

(3) Includes additions to property, plant and equipment, intangibles and \$3 million and \$5 million of interest capitalized during construction for the three and six months ended June 30, 2022 (2021 - \$3 million and \$6 million).

ADJUSTED EARNINGS

Adjusted earnings are earnings attributable to equity owners of the Company after adjusting for:

- the timing of revenues and expenses for rate-regulated activities;
- dividends on equity preferred shares of the Company;
- one-time gains and losses;
- unrealized gains and losses on mark-to-market forward and swap commodity contracts;
- impairments; and
- items that are not in the normal course of business or a result of day-to-day operations.

Adjusted earnings are a key measure of segment earnings used by the Chief Operating Decision Maker (CODM) to assess segment performance and allocate resources. Other accounts in the unaudited interim consolidated financial statements have not been adjusted as they are not used by the CODM for those purposes.

The reconciliation of adjusted earnings and earnings for the three months ended June 30 is shown below.

2022	Utilities			Energy Infrastructure	Corporate & Other	Consolidated
	Electricity	Natural Gas	Total

Alberta Utilities Commission (AUC) enforcement proceeding

On November 29, 2021, the AUC enforcement branch filed an application with the AUC recommending an enforcement proceeding be initiated. A proceeding was commenced to determine whether ATCO Electric Transmission failed to comply with AUC decisions and enactments under the AUC's jurisdiction with respect to a sole source contract for the Jasper interconnection project and the actions leading up to and including the filing of the 2018-2020 Deferral Account Application.

The AUC enforcement branch and ATCO Electric Transmission commenced settlement discussions in January 2022. On March 18, 2022, the AUC enforcement branch and ATCO Electric Transmission concluded discussions and notified the AUC that the parties had reached a settlement on all matters. On April 14, 2022, the AUC enforcement branch and ATCO Electric Transmission filed the settlement with the AUC, which reflected an agreed administrative penalty of \$31 million, a commitment to amend the ongoing Deferral Account application to ensure the estimated \$11 million of additional rate base remains excluded from customer rates, and the implementation of revised practices and policies. On June 29, 2022, the AUC issued its decision approving the settlement in its entirety.

In the fourth quarter of 2021 and during the six months ended June 30, 2022, the Company recognized costs of \$14 million and \$27 million (after-tax), respectively, related to the proceeding. As this proceeding is not in the normal course of business, these costs have been excluded from adjusted earnings.

Workplace COVID-19 vaccination standard

To safeguard the health and safety of employees, business partners, customers and communities, the Company required its employees, subject to certain exemptions, to be vaccinated against COVID-19 effective January 1, 2022. Employees who did not demonstrate they were vaccinated or did not have an approved exemption were placed on unpaid leave. These employees were subsequently offered severance and in the six months ended June 30, 2022, the Company incurred \$8 million after-tax related to amounts paid and accrued. As these costs are not in the normal course of business and are a one-time item, they have been excluded from Adjusted Earnings.

Gain on sale of ownership interest in a subsidiary company

On March 31, 2022, the Company and Denendeh Investments Incorporated (DII) entered into a share purchase agreement to increase DII's ownership interest in Northland Utilities Enterprises Ltd. (NUE) from 14 per cent to 50 per cent. NUE was an electric utility company operating in the Northwest Territories, Canada and a subsidiary of ATCO Electric Ltd. The change in ownership interest was accomplished through the Company's sale to DII of a 36 per cent ownership interest in NUE for proceeds, net of cash disposed, of \$8 million. The transaction results in the Company and DII each having a 50 per cent ownership interest in NUE.

The share purchase agreement includes a put option whereby the Company may be required to purchase the 36 per cent ownership interest that was sold to DII for fair market value, if certain conditions occur.

Commencing March 31, 2022, the Company no longer consolidates NUE as a controlled subsidiary, and instead, accounts for NUE as an investment in joint venture using the equity method of accounting. The transaction resulted in a gain on sale of \$5 million after-tax. As the gain on sale is not in the normal course of business, it has been excluded from adjusted earnings.

Transition of managed IT services

In 2020, and in the first quarter of 2021, the Company signed Master Services Agreements (MSA) with IBM Canada Ltd. (subsequently novated to Kyndryl Canada Ltd.) and IBM Australia Limited (IBM), respectively, to provide managed information technology (IT) services. These services were previously provided by Wipro Ltd. (Wipro) under a ten-year MSA expiring in December 2024. The transition of the managed IT services from Wipro to IBM commenced on February 1, 2021 and was complete by December 31, 2021.

In 2020, and during the first quarter of 2021, the Company recognized onerous contract provisions of \$71 million (\$55 million after-tax) and \$6 million (\$4 million million after-tax), respectively, which represents management's best estimate of the costs to exit the Wipro MSAs. The provisions are included in provisions and other current liabilities in the consolidated balance sheets. The onerous contract provision is not in the normal course of business and has been excluded from adjusted earnings.

In addition, for the three and six months ended June 30, 2021, the Company recognized transition costs of \$21 million and \$29 million (\$16 million and \$23 million after-tax), respectively. The transition costs related to activities to transfer the managed IT services from Wipro to IBM. As these costs are not in the normal course of business, they have been excluded from adjusted earnings.

Impairment and other costs

In the second quarter of 2021, impairments and other costs not in the normal course of business of \$65 million after-tax were recorded, mainly in Mexico, related to Energy Infrastructure's Veracruz hydro facility in the amount of \$54 million after-tax. Other costs recorded were individually immaterial.

The charge reflects an adverse arbitration decision, changes in market regulations, ongoing political uncertainty, and challenging operating environment, resulting in an impairment of the carrying value of the assets.

The recoverable amount of Energy Infrastructure's Veracruz hydro facility was determined based on fair value less costs of disposal. The expected future cash flows were estimated under an assumption of 43 years of operations, representing the useful life of the Veracruz hydro facility, and were discounted at an after-tax rate of approximately 10 per cent. The fair value measurement is categorized as level 3 on the fair value hierarchy. As at June 30, 2021, the recoverable amount of Energy Infrastructure's Veracruz hydro facility was estimated to be \$22 million.

As the charges relate to impairments, they have been excluded from Adjusted Earnings.

Unrealized gains and losses on mark-to-market forward and swap commodity contracts

The Company's retail electricity and natural gas business in Alberta enters into fixed-price swap commodity contracts to manage exposure to electricity and natural gas prices and volumes. These contracts are measured at fair value. Unrealized gains and losses due to changes in the fair value of the fixed-price swap commodity contracts are recognized in the earnings of the Corporate & Other segment.

The CODM believes that removal of the unrealized gains or losses on mark-to-market forward and swap commodity contracts provides a better representation of operating results for the Company's operations.

Realized gains or losses are recognized in adjusted earnings when the commodity contracts are settled.

Rate-regulated activities

ATCO Electric, ATCO Electric Yukon, Northland Utilities (NWT), Northland Utilities (Yellowknife), ATCO Gas, ATCO Pipelines and ATCO Gas Australia are collectively referred to as the Regulated Utilities.

There is currently no specific guidance under IFRS for rate-regulated entities that the Company is eligible to adopt. In the absence of this guidance, the Regulated Utilities do not recognize assets and liabilities from rate-regulated activities as may be directed by regulatory decisions. Instead, the Regulated Utilities recognize revenues in earnings when amounts are billed to customers, consistent with the regulator-approved rate design. Operating costs and expenses are recorded when incurred. Costs incurred in constructing an asset that meet the asset recognition criteria are included in the related property, plant and equipment or intangible asset.

The Company uses standards issued by the Financial Accounting Standards Board (FASB) in the United States as another source of generally accepted accounting principles to account for rate-regulated activities in its internal reporting provided to the CODM. The CODM believes that earnings presented in accordance with the FASB standards are a better representation of the operating results of the Company's rate-regulated activities. Therefore, the Company presents adjusted earnings as part of its segmented disclosures on this basis. Rate-regulated accounting (RRA) standards impact the timing of how certain revenues and expenses are recognized when compared to non-rate regulated activities, to appropriately reflect the economic impact of a regulator's decisions on revenues.

Rate-regulated accounting differs from IFRS in the following ways:

Timing Adjustment	Items	RRA Treatment	IFRS Treatment
1. Additional revenues billed in current period	Future removal and site restoration costs, and impact of colder temperatures.	The Company defers the recognition of cash received in advance of future expenditures.	The Company recognizes revenues when amounts are billed to customers and costs when they are incurred.
2. Revenues to be billed in future periods	Deferred income taxes, impact of warmer temperatures, and impact of inflation on rate base.	The Company recognizes revenues associated with recoverable costs in advance of future billings to customers.	The Company recognizes costs when they are incurred, but does not recognize their recovery until customer rates are changed and amounts are collected through future billings.
3. Regulatory decisions received	Regulatory decisions received which relate to current and prior periods.	The Company recognizes the earnings from a regulatory decision pertaining to current and prior periods when the decision is received.	The Company does not recognize earnings from a regulatory decision when it is received as regulatory assets and liabilities are not recorded under IFRS.
4. Settlement of regulatory decisions and other items	Settlement of amounts receivable or payable to customers and other items.	The Company recognizes the amount receivable or payable to customers as a reduction in its regulatory assets and liabilities when collected or refunded through future billings.	The Company recognizes earnings when customer rates are changed and amounts are recovered or refunded to customers through future billings.

The significant timing adjustments as a result of the differences between rate-regulated accounting and IFRS are as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	2022	2021	2022	2021
<i>Additional revenues billed in current period</i>				
Future removal and site restoration costs ⁽¹⁾	31	29	62	58
Impact of colder temperatures ⁽²⁾	4	1	-	-
<i>Revenues to be billed in future periods</i>				
Deferred income taxes ⁽³⁾	(25)	(30)	(47)	(55)
Distribution rate relief ⁽⁴⁾	-	(34)	-	(75)
Impact of warmer temperatures ⁽²⁾	-	-	(2)	(1)
Impact of inflation on rate base ⁽⁵⁾	(15)	(3)	(21)	(10)
<i>Settlement of regulatory decisions and other items</i>				
Distribution rate relief ⁽⁴⁾	30	-	65	-
Other	(5)	8	(1)	2
	20	(29)	56	(81)

- (1) Removal and site restoration costs are billed to customers over the estimated useful life of the related assets based on forecast costs to be incurred in future periods.
- (2) ATCO Gas Distribution's customer rates are based on a forecast of normal temperatures. Fluctuations in temperatures may result in more or less revenue being recovered from customers than forecast. Revenues above or below the normal temperatures in the current period are refunded to or recovered from customers in future periods.
- (3) Income taxes are billed to customers when paid by the Company.
- (4) During the three and six months ended June 30, 2021, in response to the ongoing COVID-19 Pandemic, ATCO Electric Distribution and ATCO Gas Distribution applied for interim rate relief for customers to hold current distribution base rates in place. Following approval by the AUC, ATCO Electric Distribution and ATCO Gas Distribution recorded a decrease in earnings for the three and six months ended June 30, 2021 of \$34 million and \$75 million. Based on direction from the AUC, collection of 2021 deferred rates will be maximized in 2022. For the three and six months ended June 30, 2022, \$30 million and \$65 million was billed to customers.
- (5) The inflation-indexed portion of ATCO Gas Australia's (part of Natural Gas Distribution) rate base is billed to customers through the recovery of depreciation in subsequent years based on the actual or forecasted annual rate of inflation. Under rate-regulated accounting, revenue is recognized in the current year for the inflation component of rate base when it is earned. Differences between the amounts earned and the amounts billed to customers are deferred and recognized in revenues over the service life of the related assets.

IT Common Matters decision

Consistent with the treatment of the gain on sale in 2014 from the IT services business by the Company, financial impacts associated with the IT Common Matters decision are excluded from adjusted earnings. The amount excluded from adjusted earnings in the three and six months ended June 30, 2022 was \$3 million and \$7 million (2021 - \$3 million and \$7 million).

4. REVENUES

The Company disaggregates revenues based on the nature of revenue streams. The disaggregation of revenues by each operating segment for the three months ended June 30 is shown below:

2022	Utilities			Energy Infrastructure	Corporate & Other	Consolidated
	Electricity ⁽¹⁾	Natural Gas ⁽¹⁾	Total			
2021						
Revenue Streams						
Rendering of Services						
Distribution services	146	264	410	-	-	410

Total	759	996	1,755	109	179	2,043
	672	800	1,472	70	155	1,697

(1) For the six months ended June 30, 2022, Electricity and Natural Gas segments include \$115 million of unbilled revenue (2021 - \$103 million). At June 30, 2022, \$115 million of the unbilled revenue is included in accounts receivable and contract assets (December 31, 2021 - \$103 million).

5. EARNINGS PER SHARE

Earnings per Class A non-voting (Class A) and Class B common (Class B) share are calculated by dividing the earnings attributable to Class A and Class B shares by the weighted average shares outstanding. Diluted earnings per share are calculated using the treasury stock method, which reflects the potential exercise of stock options and vesting of shares under the Company's mid-term incentive plan (MTIP) on the weighted average Class A and Class B shares outstanding.

The earnings and average number of shares used to calculate earnings per share are as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	2022	2021	2022	2021
Average shares				
Weighted average shares outstanding	269,056,531	269,695,385	269,002,521	270,847,650
Effect of dilutive stock options	132,386	46,386	94,234	21,475
Effect of dilutive MTIP	442,496	425,338	440,032	434,932
Weighted average dilutive shares outstanding	269,631,413	270,167,109	269,536,787	271,304,057
Earnings (loss) for earnings per share calculation				
Earnings for the period	153	6	382	149
Dividends on equity preferred shares of the Company	(17)	(16)	(35)	(33)
Dividends to non-controlling interests	(2)	(1)	(4)	(3)
Earnings (loss) attributable to Class A and B shares	134	(11)	343	113
Earnings (loss) and diluted earnings (loss) per Class A and Class B share				
Earnings (loss) per Class A and Class B share	\$0.50	(\$0.04)	\$1.28	\$0.42
Diluted (loss) earnings per Class A and Class B share	\$0.50	(\$0.04)	\$1.28	\$0.42

6. PROPERTY, PLANT AND EQUIPMENT

A reconciliation of the changes in the carrying amount of property, plant and equipment is as follows:

	Utility Transmission & Distribution	Energy Infrastructure	Land and Buildings	Construction Work-in- Progress	Other	Total
Cost						
December 31, 2021	21,771	500	756	431	809	24,267
Additions	16	–	–	478	2	496
Transfers	197	–	3	(210)	10	–
Retirements and disposals	(49)	–	(2)	–	(15)	(66)
Sale of ownership interest in a subsidiary company (Note 3)	(111)	–	(8)	(2)	(5)	(126)
Foreign exchange rate adjustment	(39)	4	(1)	(2)	–	(38)
Changes to asset retirement costs	–	(4)	–	–	–	(4)
June 30, 2022	21,785	500	748	695	801	24,529
Accumulated depreciation						
December 31, 2021	5,478	184	183	–	414	6,259
Depreciation	250	5	9	–	26	290
Retirements and disposals	(49)	–	(2)	–	(15)	(66)
Sale of ownership interest in a subsidiary company (Note 3)	(52)	–	(3)	–	(2)	(57)
Foreign exchange rate adjustment	(9)	1	–	–	(1)	(9)
June 30, 2022	5,618	190	187	–	422	6,417
Net book value						
December 31, 2021	16,293	316	573	431	395	18,008
June 30, 2022	16,167	310	561	695	379	18,112

The additions to property, plant and equipment included \$5 million of interest capitalized during construction for the six months ended June 30, 2022 (2021 - \$6 million).

PIONEER NATURAL GAS PIPELINE

On February 25, 2022, ATCO Gas and Pipelines Ltd., a wholly owned subsidiary of CU Inc., closed a transaction to transfer a 30 kilometre segment of the Pioneer Natural Gas Pipeline to Nova Gas Transmission Ltd. for \$63 million. This asset was previously recorded as assets held-for-sale in prepaid expenses and other current assets in the consolidated balance sheets. The proceeds from sale are included in other investing activities in the unaudited interim consolidated statements of cash flows.

7. SHORT-TERM DEBT

At June 30, 2022, the Company had \$235 million of commercial paper outstanding at an effective interest rate of 1.96 per cent, maturing in July 2022 (December 31, 2021 - \$206 million at an effective interest rate of 0.32 per cent, maturing in January 2022).

The commercial paper is supported by the Company's long-term committed credit facilities.

8. LONG-TERM DEBT

On June 3, 2022, the Company issued \$250 million of 4.851 per cent debentures maturing on June 3, 2052.

On April 1, 2022, CU Inc., a wholly owned subsidiary of the Company, repaid \$125 million of 9.92 per cent debentures.

9. EQUITY PREFERRED SHARES

DIVIDENDS

Cash dividends declared and paid per share are as follows:

<i>(dollars per share)</i>	Three Months Ended June 30		Six Months Ended June 30	
	2022	2021	2022	2021
Perpetual Cumulative Second Preferred Shares				
4.60% Series V ⁽¹⁾	–	0.2875	–	0.5750
Cumulative Redeemable Second Preferred Shares				
5.20% Series Y ⁽²⁾	0.2127	0.2127	0.4254	0.4254
4.90% Series AA	0.3063	0.3063	0.6125	0.6125
4.90% Series BB	0.3063	0.3063	0.6125	0.6125
4.50% Series CC	0.2813	0.2813	0.5625	0.5625
4.50% Series DD	0.2813	0.2813	0.5625	0.5625
5.25% Series EE	0.3281	0.3281	0.6563	0.6563
4.50% Series FF	0.2813	0.2813	0.5625	0.5625
4.75% Series HH ⁽³⁾	0.2969	–	0.5637	–

(1) The 4.60 per cent Series V Preferred Shares were redeemed in August 2021.

(2) Effective June 1, 2022, the annual dividend rate for the Series Y Preferred Shares was reset to 5.20 per cent for the next five years. Prior to June 1, 2022, the annual dividend rate was 3.403 per cent.

(3) The 4.75 per cent Series HH Preferred Shares were issued in December 2021.

The payment of any dividend is at the discretion of the Board and depends on the financial condition of the Company and other factors.

On July 14, 2022, the Company declared third quarter eligible dividends of \$0.32500 per Series Y Preferred Share, \$0.30625 per Series AA and Series BB Preferred Share, \$0.28125 per Series CC, Series DD, and Series FF Preferred Share, \$0.328125 per Series EE Preferred Share and \$0.296875 per Series HH Preferred Share.

10. CLASS A AND CLASS B SHARES

At June 30, 2022, there were 197,672,964 (December 31, 2021 - 196,958,847) Class A shares and 71,906,729 (December 31, 2021 - 72,388,274) Class B shares outstanding. In addition, there were 1,485,100 options to purchase Class A shares outstanding at June 30, 2022, under the Company's stock option plan.

DIVIDENDS

The Company declared and paid cash dividends of \$0.4442 and \$0.8884 per Class A and Class B share during the three and six months ended June 30, 2022 (2021 - \$0.4398 and \$0.8796). The Company's policy is to pay dividends quarterly on its Class A and Class B shares. The payment of any dividend is at the discretion of the Board and depends on the financial condition of the Company and other factors.

On July 14 2022, the Company declared a third quarter dividend of \$0.4442 per Class A and Class B share.

DIVIDEND REINVESTMENT PROGRAM

On January 13, 2022, the Company reinstated its dividend reinvestment program (DRIP) for eligible Class A non-voting and Class B common share owners who are enrolled in the program. The DRIP was previously suspended effective January 10, 2019.

The DRIP allows eligible Class A non-voting and Class B common share owners of the Company to reinvest all or a specified portion of their dividends in additional Class A non-voting shares.

The Class A non-voting shares are issued from treasury at a two per cent discount to the volume weighted average price of the Class A non-voting shares traded on the Toronto Stock Exchange during the last five qualifying trading days preceding the dividend payment date.

During the three and six months ended June 30, 2022, 111,958 and 210,872 Class A shares were issued under the DRIP, using re-invested dividends of \$5 million and \$8 million. The shares were priced at an average of \$39.32 and \$37.01 per share, respectively.

NORMAL COURSE ISSUER BID

On July 29, 2021, the Company began a normal course issuer bid (NCIB), to purchase up to 3,930,623 outstanding Class A Shares. The bid expires on July 28, 2022. The prior NCIB to purchase up to 3,996,004 outstanding Class A Shares began on July 22, 2020 and expired on July 21, 2021.

No shares were purchased during the six months ended June 30, 2022 (2021 - 3,576,004 Class A shares were purchased for \$119 million, resulting in a decrease to share capital of \$20 million and a decrease to retained earnings of \$99 million).

11. RETIREMENT BENEFITS

At June 30, 2022, the discount rate assumption which is used to measure the accrued benefit obligations increased to 5.29 per cent from 3.16 per cent at December 31, 2021. The discount rate assumption was based on market interest rates of high quality bonds that match the timing and amount of expected benefit payments.

Due to the re-measurement of the accrued benefit obligations and related plan assets, the funded status (market value of assets less accrued benefit obligations) increased from a net deficit of \$181 million at December 31, 2021 to a net deficit of \$173 million at June 30, 2022. The deficit of \$173 million is net of a retirement benefit asset of \$21 million related to Retirement Plan for Employees of Canadian Utilities Limited and Participating Companies (CU Plan).

The retirement benefit asset of the CU Plan has been measured at the lower of the funded surplus (\$295 million) and the asset ceiling (\$21 million). The key assumption used to determine the asset ceiling amount is a discount factor of 5.29 per cent.

At June 30, 2022, the Company recognized a retirement benefit asset of \$21 million and retirement benefit liability of \$194 million (December 31, 2021 - \$87 million and \$268 million).

12. CASH FLOW INFORMATION

ADJUSTMENTS TO RECONCILE EARNINGS TO CASH FLOWS FROM OPERATING ACTIVITIES

Adjustments to reconcile earnings to cash flows from operating activities are summarized below.

	Three Months Ended June 30		Six Months Ended June 30	
	2022	2021	2022	2021
Depreciation, amortization and impairment	156	208	313	362
Dividends and distributions received from investment in joint ventures	34	7	37	12
Earnings from investment in joint ventures	(15)	(5)	(33)	(18)
Income tax expense	47	5	124	50
Unrealized losses on derivative financial instruments	25	14	40	15
Contributions by customers for extensions to plant	63	51	108	107
Amortization of customer contributions	(13)	(13)	(27)	(27)
Net finance costs	92	96	189	193
Income taxes paid	(10)	(8)	(22)	(40)
Other	3	1	2	2
	382	356	731	656

CASH POSITION

Cash position at June 30 is comprised of:

	2022	2021
Cash	1,087	362
Short-term investments	2	1
Restricted cash ⁽¹⁾	7	5
Cash and cash equivalents	1,096	368
Bank indebtedness	-	(3)
	1,096	365

(1) Cash balances which are restricted under the terms of joint arrangement agreements are considered not available for general use by the Company.

13. FINANCIAL INSTRUMENTS

FAIR VALUE MEASUREMENT

Financial instruments are measured at amortized cost or fair value. Fair value represents the estimated amounts at which financial instruments could be exchanged between knowledgeable and willing parties in an arm's length transaction. Determining fair value requires management judgment. The valuation methods used to determine the fair value of each financial instrument and its associated level in the fair value hierarchy is described below.

Financial Instruments	Fair Value Method
Measured at Amortized Cost	
Cash and cash equivalents, accounts receivable and contract assets, bank indebtedness, accounts payable and accrued liabilities and short-term debt	Assumed to approximate carrying value due to their short-term nature.
Finance lease receivables	Determined using a risk-adjusted interest rate to discount future cash receipts (Level 2).
Long-term debt	Determined using quoted market prices for the same or similar issues. Where the market prices are not available, fair values are estimated using discounted cash flow analysis based on the Company's current borrowing rate for similar borrowing arrangements (Level 2).
Measured at Fair Value	
Interest rate swaps	Determined using interest rate yield curves at period-end (Level 2).
Foreign currency contracts	Determined using quoted forward exchange rates at period-end (Level 2).
Commodity contracts	Determined using observable period-end forward curves and quoted spot market prices with inputs validated by publicly available market providers (Level 2). Determined using statistical techniques to derive period-end forward curves using unobservable inputs or extrapolation from spot prices in certain commodity contracts (Level 3).

FINANCIAL INSTRUMENTS MEASURED AT AMORTIZED COST

The fair values of the Company's financial instruments measured at amortized cost are as follows:

Recurring Measurements	June 30, 2022		December 31, 2021	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial Assets				
Finance lease receivables	151	192	159	215
Financial Liabilities				
Long-term debt	9,413	8,597	9,308	10,830

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE

The Company's derivative instruments are measured at fair value. At June 30, 2022 and December 31, 2021, the following derivative instruments were outstanding:

- interest rate swaps for the purpose of limiting interest rate risk on the variable future cash flows of long-term debt;
- foreign currency forward contracts for the purpose of limiting exposure to exchange rate fluctuations; and
- natural gas and forward power sale and purchase contracts for the purpose of limiting exposure to electricity and natural gas market price movements.

The balance sheet classification and fair values of the Company's derivative financial instruments are as follows:

Recurring Measurements	Subject to Hedge Accounting			Not Subject to Hedge Accounting	Total Fair Value of Derivatives
	Interest Rate Swaps	Commodities	Foreign Currency Forward Contracts	Commodities	
June 30, 2022					
Financial Assets					
Prepaid expenses and other current assets ⁽¹⁾	–	82	1	–	83
Other assets ⁽¹⁾	42	60	–	2	104
Financial Liabilities					
Provisions and other current liabilities ⁽¹⁾	–	20	–	43	63
Other liabilities ⁽¹⁾	–	17	–	12	29
December 31, 2021					
Financial Assets					
Prepaid expenses and other current assets ⁽¹⁾	–	52	–	2	54
Other assets ⁽¹⁾	8	35	–	6	49
Financial Liabilities					
Provisions and other current liabilities ⁽¹⁾	1	12	–	20	33
Other liabilities ⁽¹⁾	–	8	–	6	14

(1) At June 30, 2022, financial liabilities and financial assets include \$58 million and \$2 million, respectively, of Level 3 derivative financial instruments (December 31, 2021 - financial liabilities and financial assets include \$26 million and \$8 million, respectively, of Level 3 derivative financial instruments).

Notional and maturity summary

The notional value and maturity dates of the Company's derivative instruments outstanding are as follows:

Notional value and maturity	Subject to Hedge Accounting				Not Subject to Hedge Accounting		
	Interest Rate Swaps	Natural Gas ⁽¹⁾	Power ⁽²⁾	Foreign Currency Forward Contracts	Natural Gas ⁽¹⁾	Power ⁽²⁾	Foreign Currency Forward Contracts

Maturity	2023-2025	2022-2026	2022-2026	2022	2022-2024	2022-2024	2022

(1) Notional amounts for the natural gas purchase contracts are the maximum volumes that can be purchased over the terms of the contracts.

(2) Notional amounts for the forward power sale and purchase contracts are the commodity volumes committed in the contracts.

(3) Volumes for natural gas and power derivatives are in GJ and MWh, respectively.
